Site-Wall Barrier

Available for purchase or hire and delivered nationwide, our heavy duty water filled Site-Wall barriers are ideal for ensuring security at construction sites, outdoor events and more.

Our durable, UV stabilised HDPE Site-Wall barriers are easy to deploy and move when empty, yet weigh a sturdy third of a ton (300kg) each when used with fencing and filled with water (sand can be used alternatively, if preferred).

The ingenious interlocking design of these barriers allows one continuous, and therefore less vulnerable wall to be constructed, even around corners without any compromise in strength.

Key Features

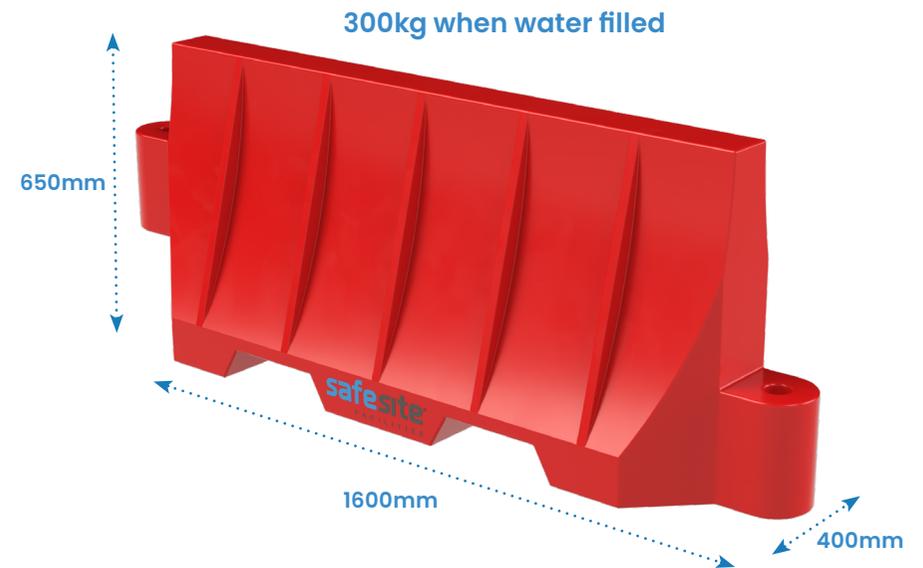

- > 300kg when filled with water
- > Allows for angles or curves
- > Can be used with mesh fence
- > Interlocking design
- > Easy to handle and install
- > UV stabilised HDPE
- > Creates a safe boundary
