Baulk Timber Wooden Sleepers

Our Baulk Timber also known as Wooden Sleepers offer a heavy-duty, versatile solution for a wide range of construction and industrial applications.

Manufactured from 100% Spruce, these solid timbers are designed to withstand demanding environments while offering protection and stability. Timbers are wax painted red & white to maximise visibility of each sleeper.

Commonly used along roadways and perimeters, baulk timbers help to protect pedestrians and prevent damage to temporary construction site fixtures, such as scaffolding. Their robust dimensions and durability make them ideal for projects requiring long-term performance and safety. Sustainably sourced and fully recyclable, these sleepers are an environmentally conscious choice for any project.

Baulk Timber ready for dispatch

Baulk Timber Wooden Sleepers Specification

Description	Size (mm)	Weight (kg)
SBS200850 – Baulk Timber Wooden Sleepers	H300 x W6000 x D300	216

Key Features

- Made from 100% Spruce – strong, durable, and eco-friendly
- Ideal for scaffolding, construction, civil engineering, and marine or agricultural use
- Provides safe vehicle access over boggy or unstable ground
- Prevents impact from passing traffic and encroaching into pedestrian or scaffold areas
- A shorter 2.4m length is available on request
