3m Concrete Barrier

If you are looking to prevent vehicular access at vulnerable sites such as vacant premises, car parks or warehouses, you will find our high level security concrete barriers a simple and cost-effective solution

With each weighing more than two and half tonnes, our three meter concrete barriers are virtually impossible for would-be trespassers, such as thieves, vandals and travellers to move without access to specialised lifting equipment.

These reinforced barriers which are also available in 1.5m, 4m, and 6 metre lengths are also ram-resistant, providing you with additional peace of mind.

Key Features

- Reinforced for extra strength and durability
- Virtually immovable without specialist lifting equipment
- Ideal for blocking vehicle access
- Reinforced with a high tensile steel rebar
- Can be custom made to include posts
- Weighs over 2 tonnes
- Use block grab to manoeuvre concrete block

3m concrete barriers in situ

Offloading of 3m concrete barrier

Description	Size (mm)	Weight (kg)
CBS120540 – 3m Concrete Barrier	H760 x W2945 x D440	2250

Block grab is preferred when lifting an manoeuvring concrete block
