Utility Barrier

The Utility Barrier, also known as a Manhole Barrier, is a versatile and reliable solution designed to improve pedestrian safety across various environments – most commonly around manholes.

Its compact, stackable design makes storage and transportation straightforward, while the durable double-clip hinge system offers greater stability than many alternative barriers on the market.

Though primarily used around manholes, the Utility Barrier proves its worth in a wide range of other applications. It is an excellent choice for cordoning off telecom junction boxes, work areas, or retail aisles during cleaning or maintenance operations. Its flexibility and durability make it a practical and dependable tool across multiple sectors.

Utility Barrier – Red

Description	Size (mm)	Weight (kg)
SBS200230 – 750mm Utility Barrier – 3 Gate – Red	H1000 x W750 x D20	8.1
SBS200232 – 750mm Utility Barrier – 4 Gate – Red	H1000 x W750 x D20	10.8
SBS200240 – 1000mm Utility Barrier – 3 Gate – Red	H1000 x W1000 x D20	10.8
SBS200242 – 1000mm Utility Barrier – 4 Gate – Red	H1000 x W1000 x D20	14.4

Utility Barrier – Blue

Description	Size (mm)	Weight (kg)
SBS200235 – 750mm Utility Barrier – 3 Gate – Blue	H1000 x W750 x D20	8.1
SBS200238 – 750mm Utility Barrier – 4 Gate – Blue	H1000 x W750 x D20	10.8
SBS200245 – 1000mm Utility Barrier – 3 Gate – Blue	H1000 x W1000 x D20	10.8
SBS200248 – 1000mm Utility Barrier – 4 Gate – Blue	H1000 x W1000 x D20	14.4

Key Features

- Available in two sizes: 750mm and 1 metre gates
- Recessed reflective panels are fully Chapter 8 compliant
- Interlocking lugs allow barriers to stack securely and safely
- Built-in channels guide rainwater away to prevent pooling
- Made from strong, recyclable plastic for long-lasting heavy use
- Suitable for both indoor and outdoor applications everywhere
- Lightweight design makes carrying, deploying, and storing easy
- Available in Red & Blue. Other colours available on request.
