Pedestrian Barrier Ballast Bag

These discreet ballast bags are a simple and straight forward solution for weighting down pedestrian barriers in high winds.

The clip-on nature on the bags ensures that they can be quickly fitted and removed as required. Up to three bags can be fitted to a barrier within minutes and increases the wind load resistance by 87%. These ballast bags are compatible with all major pedestrian barrier variants in the market. The position of the bag and material also protects against corrosion, so these perform well outdoors.

Pedestrian Ballast Bag Specification

Measurements in mm

Length	Width	Height	Weight (kg)	Product ID
500	160	150	10	PBS130450
