## Evo 500 Barrier

The Evo 500 barrier is perfectly designed for handling event traffic, regulating pedestrian flow, controlling access, and establishing roadblocks.

You can connect these barriers to create a continuous partition, ensuring seamless security. You have the option to raise their height by incorporating mesh or reflective panels that adhere to Chapter 8 safety regulations.

Manufactured from UV-resistant MDPE plastic, these barriers are both easy to transport and install while ensuring exceptional durability in outdoor environments.
