WELCOME TO OUR PRODUCT GUIDE

We are pleased to present our new product guide which is a non-exclusive list of all our products and services.

You may be surprised to learn how customisable most of our products are, with different colours and sizes commonly available. If what you need is not listed here, we can source it.

Our SafeSite promise guarantees you high standards of service, nationwide coverage, hassle and cost-free quotes, and the most competitive prices the industry has to offer.

All our sales personnel are experienced in all things safety and security. They can advise on the appropriate solution by task and location and organise delivery and installation anywhere in the UK.

Michael Knibbs -
Founder of SafeSite Facilities

DID YOU KNOW?

You can hire all the elements of a barrier system you require, instead of buying the products outright

If you have a short-term project or restricted budget, hiring a system can offer several benefits:

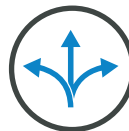

Cost effectiveness

No upfront costs and pay only for the time you use our products.

Zero storage

Save on storage space and costs.

Flexibility

If your project finishes early, we can collect the products and your fee stops.

Sustainability

Hire what you need for the time you need and save on transport and waste.

We will always offer the best price on our products and services. Not only do we supply, deliver, and install our products anywhere in the UK but also buyback any product. If you've completed your project and can't take your barriers with you, we'll buy them from you.

We offer sale, hire and buyback on all our products. Contact our sales team for more information.

WATER FILLED BARRIER FENCING & HOARDING

HOARDING
GATES OPTIONS
AVAILABLE

DID YOU KNOW?

A lot of our water filled barriers are compatible with mesh or hoarding. Each individual water filled barrier has it's own range of mesh fencing and hoarding, all of which is made from steel and powder-coated white.

This varies from barrier to barrier, for any queries on our fencing range for our water filled barriers, get in contact with our sales team. We're always happy to help!

We offer a comprehensive range of water filled barriers which can be used with mesh fence panels, hoarding panels and gates. The systems are perfect for situations where it's not possible to break ground such as heritage sites, airports, railways, highways, events, and construction sites. They offer a semi-permanent, secure, and safe solution that can be used to either fully or partially obscure a site.

Whilst we stock white and red versions of the barriers as standard. We custom manufacture water filled barriers in **any RAL colour**.

Pedestrian barriers are an ideal solution for crowd control and creating designated walkways. We stock, deliver, and install options with fixed feet, loose feet, and the ability to expand and contract as required. We strive to offer the maximum number of options available which is why you'll also find gated walkthroughs and illuminated walkways within this section of our catalogue. We custom build and provide stillages for storing pedestrian barriers. Please contact our sales team for more information.

The ease of stacking, transporting and assembling these barriers makes them an industry favourite. They do not require any accessories and easily deal with uneven terrain.

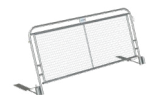

Description	Size (mm)	Weight (kg)
PBS130100 2.3m Fixed Leg Pedestrian Barrier	H1100 x W2262 x D490	14

This loose foot option for the pedestrian barriers means that they can be stacked easily. The detachable feet are sold separately.

Description	Size (mm)	Weight (kg)
PBS130300 2.3m Loose Leg Pedestrian Barrier	H1100 x W2262 x D38.1	12
PBS130350 3.5m Loose Leg Pedestrian Barrier	H1100 x W3450 x D38.1	11

The concord barrier (also known as the cycle barrier) is made from galvanised tubular steel with anti-climb mesh infill. These barriers work very well with event signage. Stillages also available for storage.

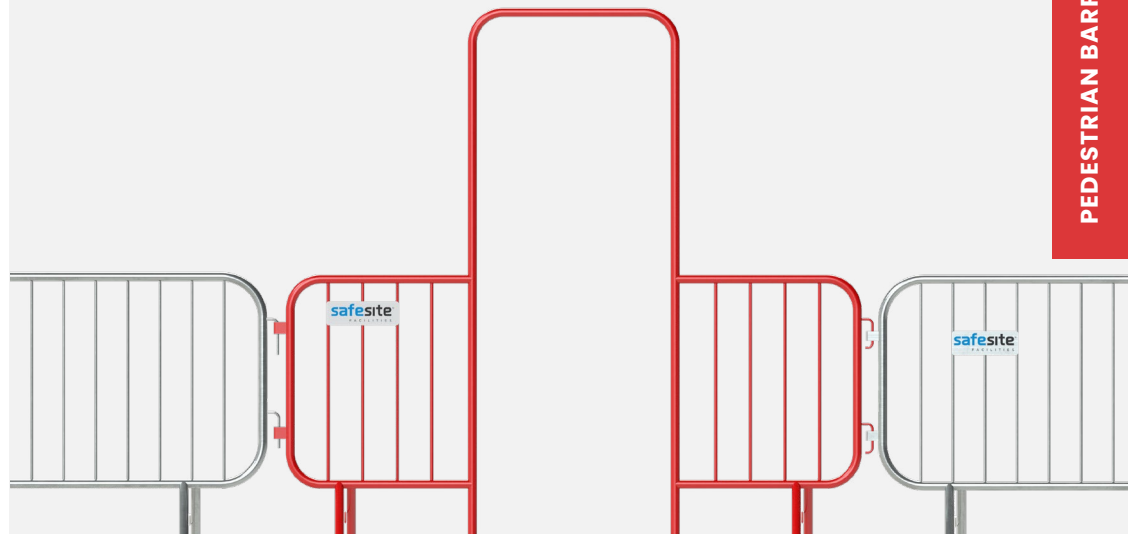

Description	Size (mm)	Weight (kg)
PBS130500 3m Concord Pedestrian Barrier	H1300 x W3000 x D815	35

This barrier features a 705mm angled base for stability.

Description	Size (mm)	Weight (kg)
PBS130550 1.5m Police Pedestrian Barrier	H1065 x W1526 x D705	26

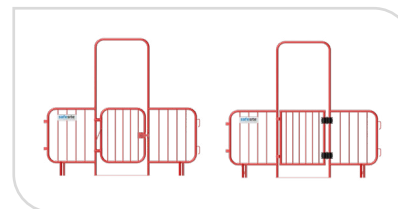

Colour Options:

The walkthrough barrier connects to pedestrian barriers to create a designated access point. The barrier can be supplied with or without a gate. Different gate options are available (see below for more details).

Description	Size (mm)	Weight (kg)

Plastic Hinge Gate

Expanding Barriers

Expandable barriers are versatile security and crowd control barriers which are fully retractable and easily stored. Suitable for indoor and outdoor use, the bright and aesthetically pleasant design works well in a wide range of settings and sectors. Its concertina design enables a flexible perimeter.

Colour Options: ● ●

The Centipede II comes in 1.2m and 1.8m heights with options for 2m and 4m expanded widths. Just like a concertina, the barrier contracts and expands as required and can be locked into position and adjoined to another barrier. Utilising an improved full metal construction, the Centipede II is a robust and versatile pedestrian barrier.

Description	Size (mm)	Weight (kg)
RES140405 – 1.2m x 2.1m Centipede Barrier II	H1200 x W2100 x D450	38
RES140435 – 1.8m x 2.1m Centipede Barrier II	H1800 x W2100 x D450	45
RES140480 – 1.8m x 4m Centipede Barrier II	H1800 x W4000 x D450	75

Centipede Barrier

The lighter weight Centipede Barrier is used for crowd and pedestrian management and retracts in a concertina style so it's easy to store and deploy.

Description	Size (mm)	Weight (kg)
RES1400420 – 1.2m Centipede Barrier	H1200 x W2100 x D600	24.5
RES1400430 – 1.8m Centipede Barrier	H1800 x W2100 x D600	33.8

Colour Options: ● ●

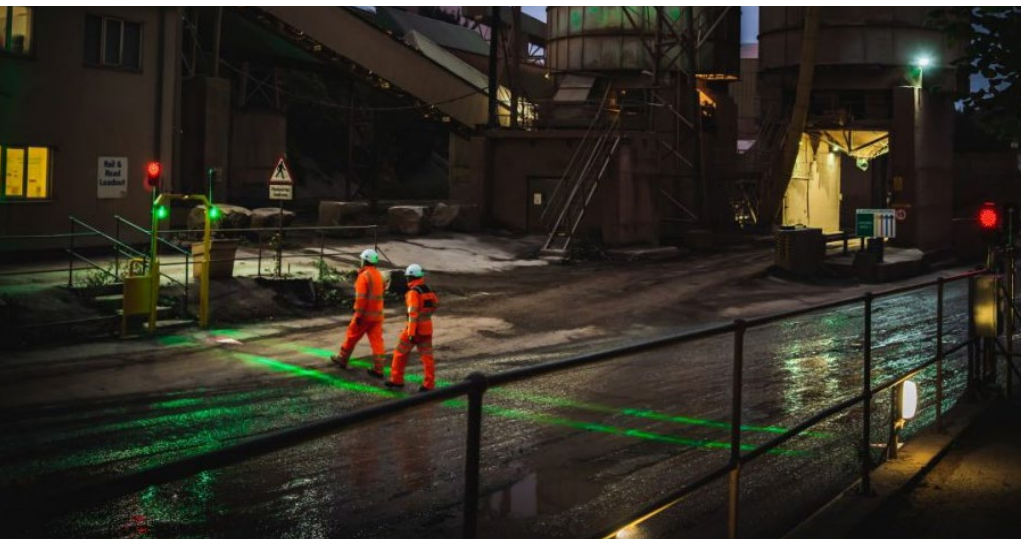

The Titan Expanders can be used to span an area which varies in size. They connect easily to the titan barrier and stow away neatly for storage.

Description	Size (mm)	Weight (kg)
RES140320 – Titan Expandable Barrier	H1000 x W3100 x D650	10.5

Retractable barriers are ideally suited for indoor use, and create queuing systems with ease.

Description	Base	Size (mm)	Weight (kg)
RES140620 – Belt Barrier	Standard	H1005 x W350 x D350	9
RES140630 – Belt Barrier	Premium	H1005 x W350 x D350	9
RES140640 – Belt Barrier	Stackable	H1005 x W350 x D350	9

Light up your site in poor weather or lighting conditions with the illuminated walkway.

Description

PBS132000 – Illuminated Walkway

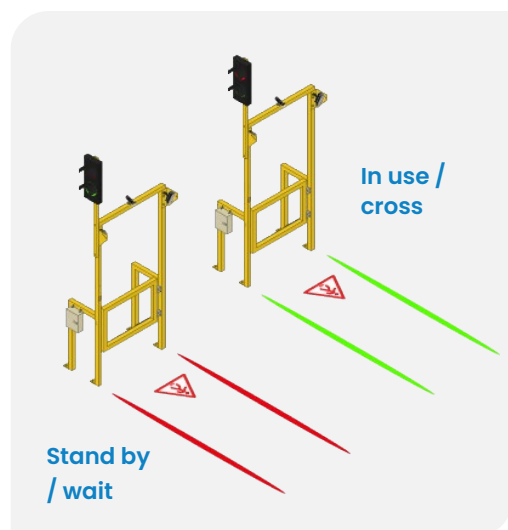

Size (mm)

H1950 x W1000 x D400

The illuminated walkway system alleviates the challenge of on-site communication and offers a safe and efficient solution for protecting your workforce.

The system features a walkthrough barrier with a magilock gate (optional) led traffic light and FHOSS cast protector.

Installation is completed by a specialist team who can offer the best advice on placement and usage.

SITE WELFARE ITEMS

We offer a range of site welfare products for all your construction needs, such as the following...

Portable toilets

Hand sanitation stations & dispensers

Large litre gel sanitisers

Cycle & smoking shelters

Lockers and more!

Whatever your site welfare needs, we're happy to help. Contact our friendly sales team for more information about our full range of products and solutions.

WHAT IS CHAPTER 8?

Chapter 8 is a set of regulations and safety measures for traffic management and road works.

Chapter 8 stipulates the requirements for safety measure, signage, and traffic management plans.

High visibility clothing

Safety and visibility

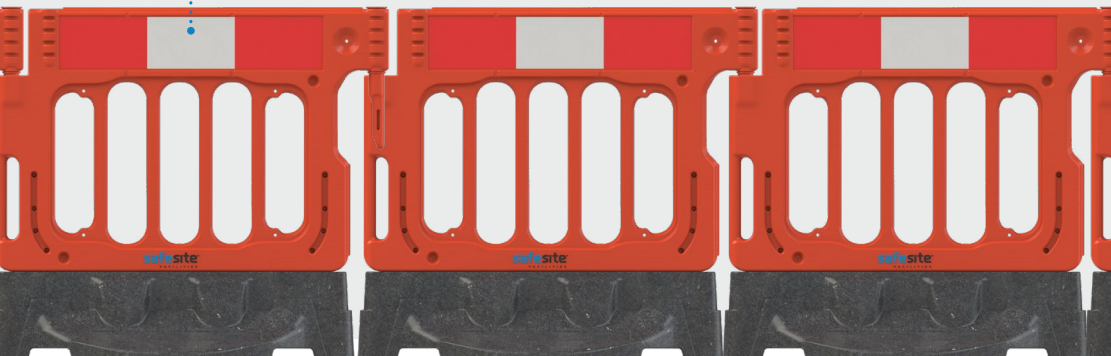

Warning signs

Vehicle markings

Chapter 8 Hi-Vis Compliant Barrier

Does your site measure up?

We can advise on the correct barriers, as well as the correct height and visibility measures you need to consider. Contact a member of our sales team for support and guidance.

To learn more about Chapter 8 see the knowledge base section of our website.

We offer a diverse range of products which comply with regulatory requirements and standards for use on highways and construction sites.

Popular products include different types of Chapter 8 gate barriers, crash tested steel barriers and an array of traffic cones.

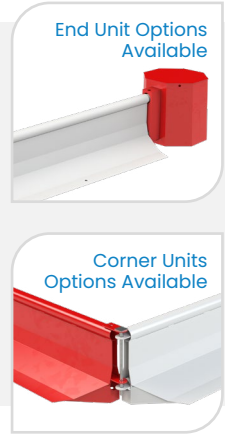

More information on the different standards that barriers and signage need to adhere to can be found on our website.

Road Barriers

Construction projects which are located close to heavy traffic or fast-moving vehicles such as aircraft, vehicles or trains require barriers which feature crash and wind test credentials for optimum performance and safety.

Manufactured in the UK

Colour Options:  

The Manta is a durable, all-weather road safety barrier that is crash and wind tunnel tested, quick and easy to install. The barriers are made from steel for a highly sustainable option for your construction project. They are also compatible with the Mass Barrier.

Description	Size (mm)	Weight (kg)
MTS200000 – Manta Barrier	H420 x W1500 x D500	48
MTS200100 – Manta Corner Sections Type 1	H420 x W1570 x D500	43
MTS200120 – Manta Corner Sections Type 2	H420 x W1505 x D500	43
MTS200180 – Manta End Unit Male	H500 x W660x D490	17
MTS200190 – Manta End Unit Female	H500 x W580 x D490	19
MTS200300 – Manta Connecting Pin	H383 x W140 x D74	1.22
MTS200400 – Manta 3m Mesh Fence Panel	H1580 x W2968 x D38	15
MTS200450 – Manta 1.5m Pedestrian Fence	H580 x W1463 x D38	6

Easy To Install

The barriers slot together with ease and secure in place with a pin

Crash tested

Crash tested to T2 W7 levels without reinforcement. Only connection pins are required for this standard

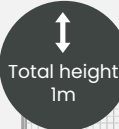

Wind Tested

‘Class A’ Wind Tunnel Test Certification

Ped Fence

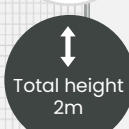

Hi-Vis Ped Fence

Manta Ped Gate

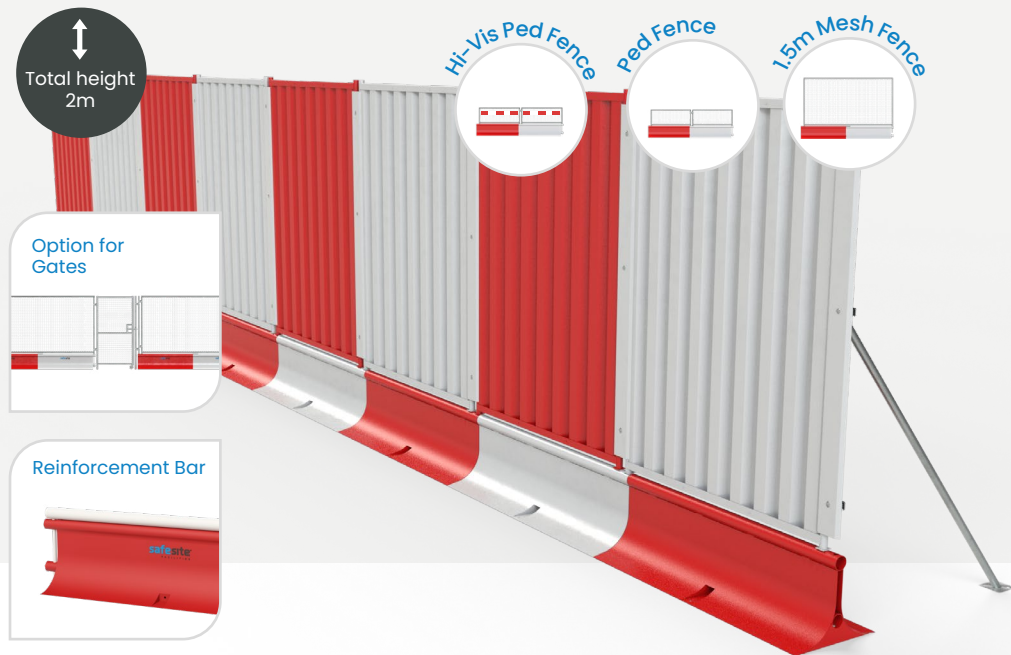

Mesh Fence

Ped Gate

Vehicle Gate

Gates can be added onto the Manta barriers, please see **page 106** for more info.

Colour Options: ● ○

The Mass crash barrier is a durable, all-weather road safety barrier that is crash and wind tunnel tested. Add a steel reinforcement bar to ensure crash test performance.

SBS200320 – Anti-Trip Gate Barrier Foot	H830 x D76	2

Colour Options: 

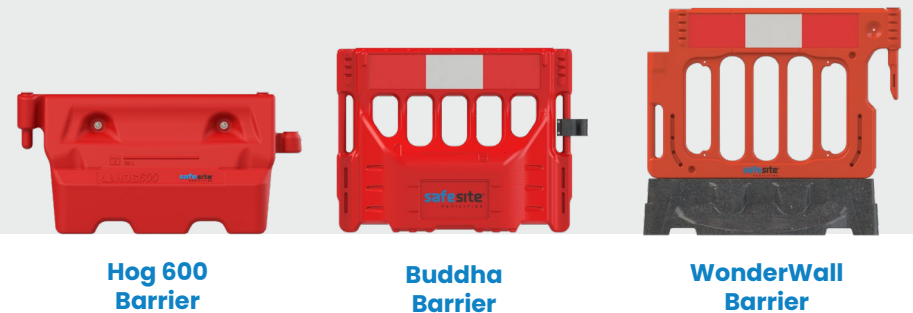

The Titan is available in 1.5m and 2m lengths and can be clipped to the expanding versions of the same barrier. They are 100% recyclable and easy to stack for compact storage.

Description	Size (mm)	Weight (kg)
SBS200400 – 1.5m Titan Barrier	H1005 x W1530 x D50	13.5
SBS200410 – 2m Titan Barrier	H1005 x W1930 x D50	14.6

FAST FIT TOPPERS

You can quickly add height to the following water filled barriers with the mini topper and double top panels. The WonderWall barriers feature a removable recycled plastic base which acts as excellent ballast and works similarly to the StrongWall. See [page 50 & 51](#) for more info.

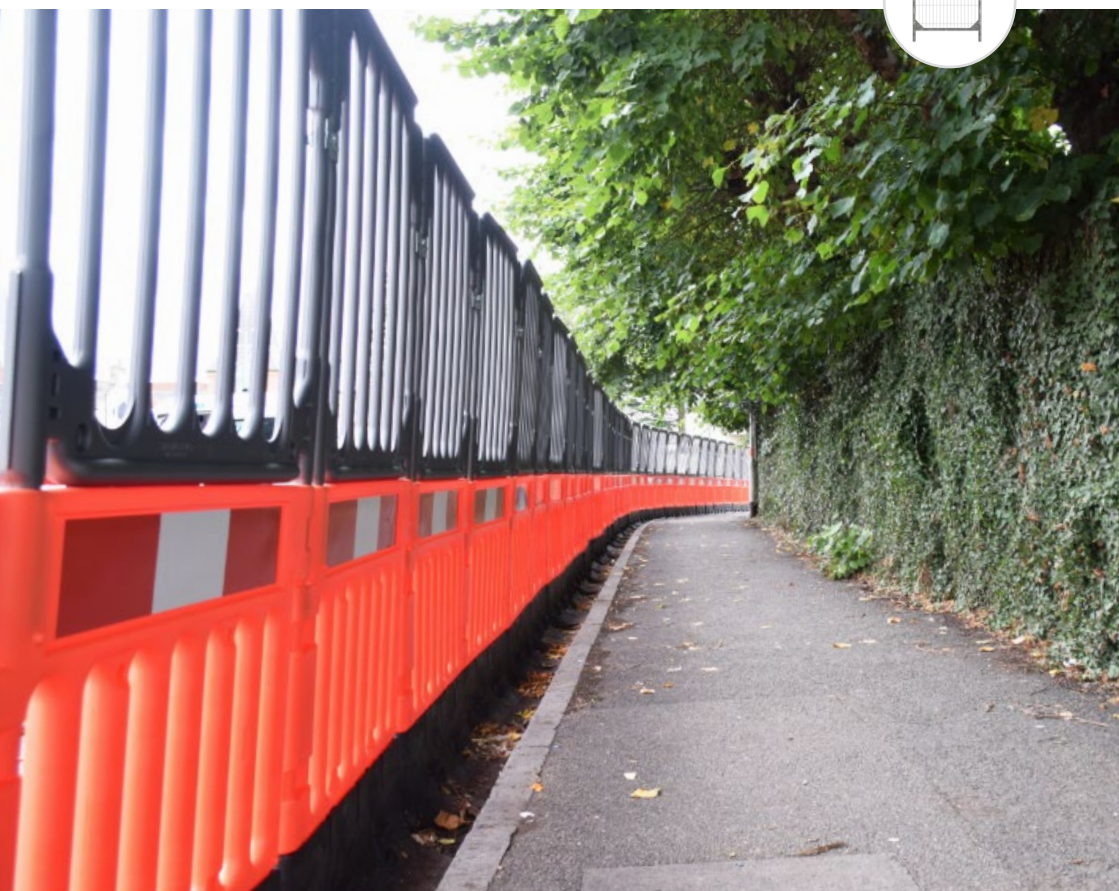

Total heights

Streetwork Barriers	Mini Topper	Double Top
Hog 600 Barrier	1.1m	1.56m
Buddha Barrier	1.35m	1.81m
WonderWall Barrier	1.54m	2m

Colour Options: ● ○

The StrongWall is a heavy duty plastic barrier onto which you can add a mesh or plastic fence panel. These are quick and easy to install and feature a rubber base which is made from recycled plastic.

Description	Size (mm)	Weight (kg)	Weight Filled (kg)
SBS200900 – StrongWall Barrier	H1000 x W1000 x D520	22	37
SBS200930 – StrongWall Barrier Plastic Fence Panel	H1000 x W1000 x D60	3.5	–
SBS201090 – StrongWall Barrier Mesh Fence Panel	H1060 x W965 x D38	5	–

Mini Topper

Double Top

Mesh Panel

Colour Options: ● ● ●

The WonderWall is a durable, robust barrier with a rubber base. Whilst we stock the barrier in yellow and orange, it can be manufactured in any RAL colour.

Description	Size (mm)	Weight (kg)
SBS200050 – WonderWall Barrier	H1000 x W1140 x D500	25
SBS201090 – WonderWall Mesh Fence Panel	H1060 x W965 x D38	5
SBS200990 – Mini Topper Panel	H535 x W1115 x D50	3
SBS201130 – Double Top Panel	H1000 x W1115 x D60	2.8

V-Fence Barrier

The V-Fence Barrier provides an lightweight alternative solution to traditional metal heras fencing that is quick to install and is also a hi-vis chapter 8 panel.

Description	Size (mm)	Weight (kg)
SBS200250 – V-Fence Barrier	H2005 x W1000 x D75	8.2

These are hinged barriers which are used to surround utility holes and span areas to restrict access. Compact, lightweight, and 100% recyclable, these make excellent street work barriers.

Description	Size (mm)	Weight (kg)
SBS200200 – SafeGate Barrier 3 Part	H1000 x W2250 x D60	6
SBS200220 – SafeGate Barrier 4 Part	H1000 x W3000 x D80	10
SBS200230 – SafeBase Barrier Stabilisation Foot	H80 x W340 x D340	2.6

Postman Barrier

This is a modular system which includes 1.25m and 2m wide reflective planks. The system can be used to create lines or box formations and is 100% recyclable.

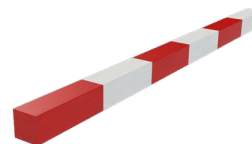

Description	Size (mm)	Weight (kg)
SBS200550 – Postman Barrier 2m Plank	H176 x W2000 x D30	2.2
SBS200560 – Postman Barrier 1.25m Plank	H176 x W1250 x D30	1.75
SBS200580 – Postman Barrier Base	H128 x W445x D445	4
SBS200590 – Postman Barrier Posts	H1150 x W100 x D100	1

Thor Barrier

These are highly stable, durable barriers which can be used in combination with various bases. The barriers connect together with ease and can be used with signage and lamps. They are also customisable and recyclable.

Description	Size (mm)	Weight (kg)
SBS201300 – Thor Barrier	H1060 x W2060 x D50	9.5

Baulk Timber

Also known as wood sleepers, baulk timber is used next to roadways to stop traffic, protect pedestrians and construction works. The timbers are wax painted red and white to maximise visibility.

Description	Size (mm)	Weight (kg)
SBS200845 – Small Baulk Timber	H200 x W6000 x D200	72
SBS200850 – Std Baulk Timber	H300 x W6000 x D300	216

ARMCO

Armco barriers are used to provide safety in a variety of places such as highways, car parks and construction sites. They are made from robust galvanised steel, strong enough to withstand the impact of a car and prevent collisions.

We provide a range of accessories and options for ARMCO barriers.

NEED ROADWORKS SIGNAGE FOR YOUR SITE?

Traffic signs play a vital role directing, controlling and informing road users behaviour. Signage needs to meet with requirements set out by British Standards, Streetworks and the Chapter 8 manual.

We provide different sizes and options for streetworks signage. Get in contact with our sales team for all of your streetwork needs - email info@safesitefacilities.co.uk

Speed Ramps & Road Plates

Speed ramps are an effective way to calm traffic and make road flow slower and safer. Road plates are a quick and easy way to cover temporary excavations and feature an anti-slip aggregate on the surface.

Traffic calming speed ramps have good grip in wet conditions and can be easily bolted to the floor.

Description	Size (mm)	Weight (kg)
STS210050 – Speed Ramp 30mm x 500mm	H30 x W500 x D480	8
STS210060 – Speed Ramp 30mm End Piece	H30 x W210x D480	3
STS210070 – Speed Ramp 50mm x 500mm	H50 x W500 x D480	8
STS210080 – Speed Ramp 50mm End Piece	H50 x W210x D480	3
STS210090 – Speed Ramp 75mm x 500mm	H75 x W500 x D480	11.5
STS210100 – Speed Ramp 75mm End Piece	H75 x W210 x D480	5.5

Road Form

Made from steel, road forms are used as a form of shuttering for concrete slabs or floors. They are 3m in length and connect using joiners to create the size and shape required.

Description	Size (mm)	Weight (kg)
STS210300 – Road Form – 4" 3m Flexi	H100 x W3000	14.5
STS210310 – Road Form – 6" 3m Flexi	H150 x W3000	19.5
STS210320 – Road Form – 4" 3m Square Edge	H110 x W3000	21
STS210330 – Road Form – 6" 3m Square Edge	H150 x W3000	25.8
STS210340 – Road Form – 8" 3m Square Edge	H200 x W3000	30.5
STS210380 – Road Form Stake 20mm x 450mm	H450 x W20	1.73
STS210390 – Road Form Stake 20mm x 600mm	H600 x W20	2.31

Ramps

We stock and deliver a range of anti-slip and heavy duty ramps for facilitating pedestrian and vehicular access on roads or kerbs.

Cable/Hose Protection Ramp

Install a cable/hose protection ramp for temporary or semi-permanent applications such as construction sites, emergency works and road works. The ramps allow for cables to run over roads without complication.

Description	Size (mm)	Weight (kg)
STS210200 – Large 3 Channel Cable/Hose Protection Ramp	H75 x W960 x D600	5.5
STS2100210 – Large 2 Channel Cable/Hose Protection Ramp	H50 x W1000 x D50	4
STS210250 – HD Hose and Cable Ramp	H100x W900 x D615	26

Adjustable, anti-slip safe kerbs ensure easy and fair access for wheelchairs. The ramps also feature raised sides to provide extra safety.

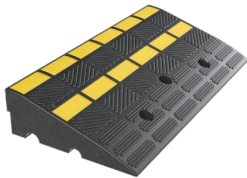

Description	Size (mm)	Weight (kg)
STS210950 – SafeKerb Wheelchair Ramp	H112 x W1265 x D747	6

Safe Kerb SupaGrip Ramp

SupaGrip Ramps are adjustable, and feature an anti-slip surface to ensure easy and fair access for wheelchairs. The ramps also have raised sides to provide extra safety.

Description	Size (mm)	Weight (kg)
STS210960 – SupaGrip SafeKerb Wheelchair Ramp	H110 x W1280 x D760	10

TrafficLine Kerb

These ramps are a fast and easy way to enable wheelchairs, trolleys, and vehicles to mount a kerb. They feature reflective yellow strips and channels to allow water to filter through and can withstand vehicle weights of up to 40 tonnes.

Description	Size (mm)	Weight (kg)
STS211050 – HD TrafficLine Kerb Ramp 100mm	H100 x W600 x D300	11
STS211060 – HD TrafficLine Kerb Ramp 150mm	H150 x W600 x D360	20

Bollards, posts and cones

We stock and supply a range of goal posts, bollards and cones for various types of sites and scenarios. Our range includes self-supported as well as more permanent, 'in ground' options.

Colour Options: 

The GS6 Height restriction barriers warn vehicles to the danger of overhead cables, bridges, and powerlines. The posts sit in steel bases or ballast blocks to secure in place.

Description	Size (mm)	Weight (kg)
STS211400 – Goal Post Telescopic Posts	H1800 (7300MAX) x W50 x D50	3.5
STS211410 – Goal Post Steel Bases	H7300 x W7600 x D500	13.5
STS211420 – Goal Post Bunting	W25000	0.3
STS211430 – Goal Post Solid Bar	H50 x W1800 (7300MAX) x D50	3.9
STS211440 – Goal Post Water Filled Bases	H520 x W500 x D500	8.5

Bell Bollard

Made from cast iron, the bell bollard is hard-wearing and can last over 25 years. They are traditionally used to protect public spaces and pedestrians from vehicles mounting pavements, street corners and curb sides.

Description	Size (mm)	Weight (kg)
STS211500 – Bell Bollard	H475 x W600 x D600	165
STS211510 – Bell Bollard (Half)	H475 x W300 x D600	125
STS211520 – Bell Bollard (Three Quarter)	H620 x W315 x D615	120
STS211530 – Bell Bollard Kerbline	H475 x W600 x D600	80

3Sixty Bollard

The 3Sixty self-righting bollard conforms to BS 8442 and crash tested to BS EN 12767. Made from plastic with a rubber base, it is covered with a rigid reflective material and is proven to be weather resistant.

Description	Size (mm)	Weight (kg)
STS211550 – 3Sixty Bollard – Keep Left	H960 x W370 x D85	5
STS211560 – 3Sixty Bollard – Keep Right	H960 x W370 x D85	5
STS211570 – Anchor Cradle for 3Sixty Bollard	H60 x W210 x D210	1.2

Protectors are incredibly strong and suitable for indoor and outdoor use. Air pressure release cushions to minimise impact and prevent damage.

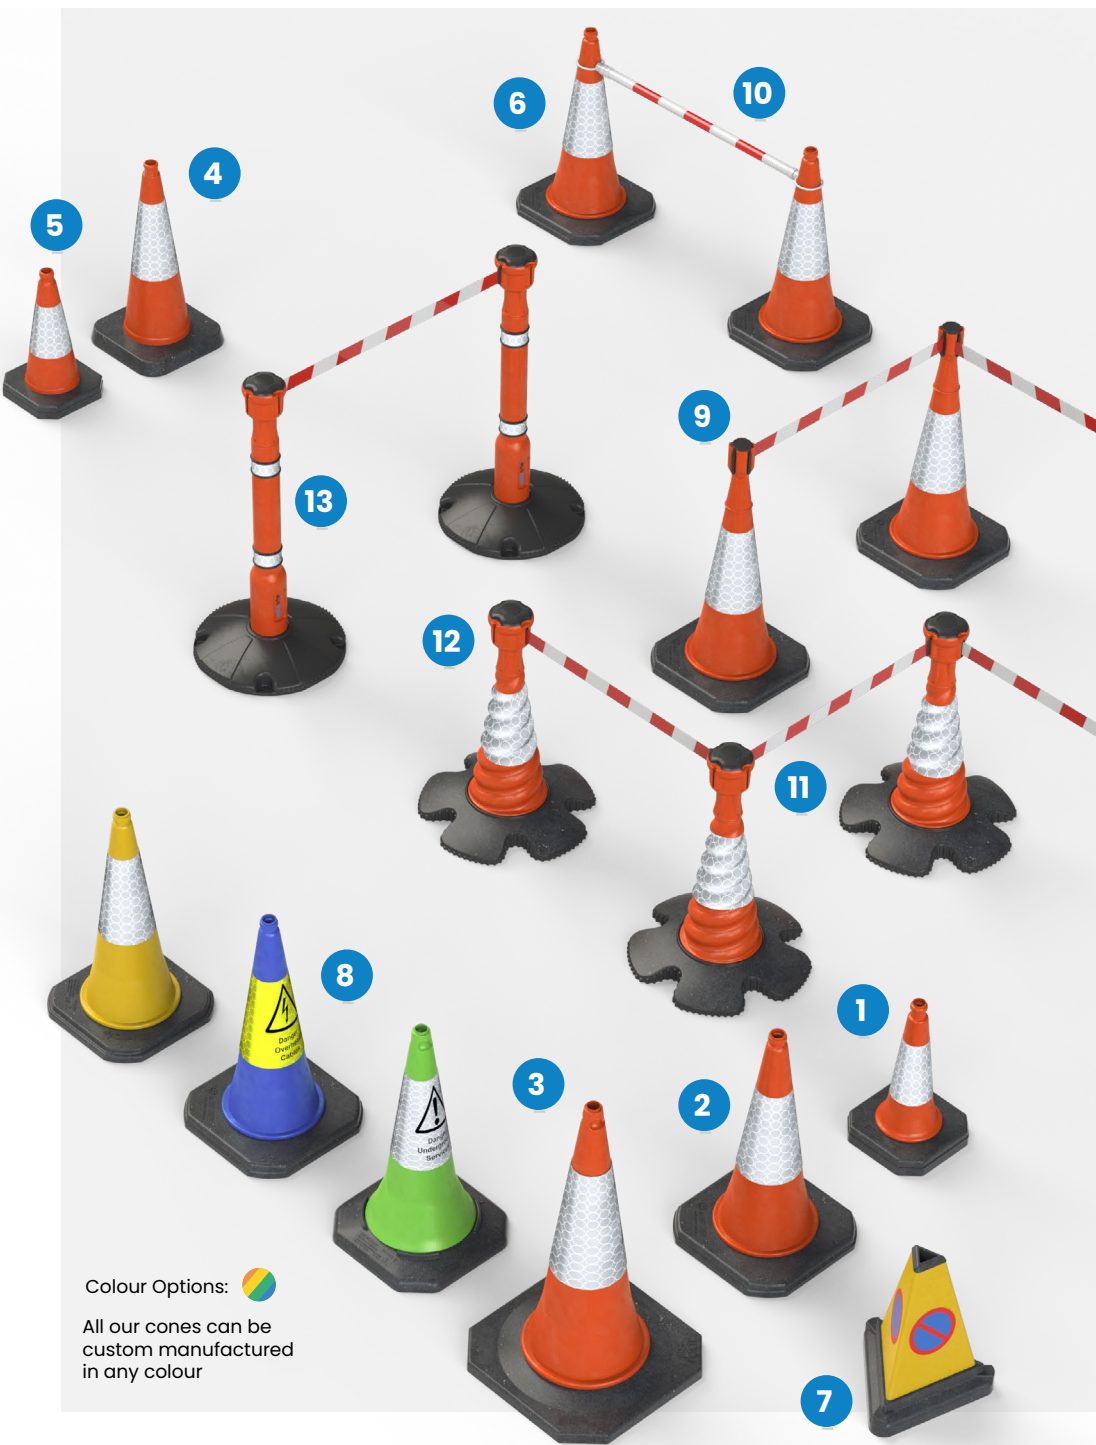

Description	Size (mm)	Weight (kg)
STS211650 – Column/Pillar Protector S200	H1100 x D610	27
STS211660 – Column/Pillar Protector S300	H1000 x D610	27

Flexible Traffic Posts

Commonly used in car parks, shipping yards and driver training, these bollards feature a heavy-duty cord so they flex and spring back into position. They are made from UV stabilised HDPE and designed for extended external use.

Description	Size (mm)	Weight (kg)
STS211900 – Flexible Highway Post	H1000 x W100 x D100	2.5

We stock and supply a range of cones and accessories. The popularity of cones in construction is undoubtedly due to how fast and easy they are to deploy. Add accessories such as high visibility tape, posts, and poles to increase the versatility and reach of these one and two-piece units.

	Description	Size (mm)	Weight (kg)
1	STS2I1950 - 500mm 2 Piece Cone	H500 x W270 x D270	2.75
2	STS2I2060 - 750mm 2 Piece Cone	H750 x W290 x D290	4.75
3	STS2I2070 - 1000mm 2 Piece Cone	H1000 x W550 x D550	7
4	STS2I2I00 - 750mm 1 Piece Cone	H750 x W380 x D270	3
5	STS2I2I10 - 450mm 1 Piece Cone	H450 x W290 x D270	3
6	STS2I2I20 - Big Foot Road Cone	-	-
7	STS2I2I70 - 'No Waiting' Cone	H540 x W270 x D270	3
8	STS2I2I90 - Cone Sleeves	-	-
9	STS2I2210 - Cone Topper Set Tape 3.65m	H232 x W3650 x D50	0.5
10	STS2I2250 - Telescopic Demarcation Pole	H450 x W1100-2200 x D270	0.6

Skipper manufactures a number of products which can be quickly added to cones to increase their versatility and value on site.

	Description	Size (mm)	Weight (kg)
11	STS2I2290 - Skipper Cone	H750 x W555 x D555	5.4
12	STS2I2300 - 9m Skipper Unit	H240 x W145 x D145	0.795
13	STS2I2340 - Skipper Post & Base System	H1000 x W500 x D500	2.3

Additional Items

Skipper Wall Support Bracket

Skipper Receiver Clip

Skipper Rechargeable Safety Light

MonoLight LED

The X-ECO Mobile Lighting tower is rugged, long lasting and safe. It guarantees an illuminated area of 3800 sqm, which automatically sparks into life once the sensors detect dim lighting. The lighting unit has technology which allows for maximum fuel efficiency and reliability.

FAST & EFFICIENT DELIVERY

WE HAVE YOU COVERED!

You need to know that you can rely on your product being delivered to the right place at the right time.

Our fleet of vehicles can deliver our products Nationwide, we also have the capability to deliver anywhere across Europe.

We have also been awarded FORS gold which confirms that we demonstrate dedication to driver and vehicle safety, and effective operations and fuel efficiency.

**NATIONWIDE
DELIVERY!**

INTERESTED IN OUR USED STOCK?

Contact our
Sales team on
0800 012 5352

We have used mesh, hoarding, concrete, and water filled barriers available to buy. These products are ex-hire or 'buy backs' that we ensure are fit for use. As second-hand stock, these may have scuffs and scratches but will still prove effective for the task at hand.

Concrete barriers last for decades and are perfect for use as low cost, high security barricades. Used stock is particularly good for remote or discreet locations where aesthetics are less significant. We also provide pictures of the actual items so you can be sure of receiving a quality product from us.

REASONS TO BUY USED STOCK:

- ✓ Budget-friendly
- ✓ Great for small projects
- ✓ It's good for the environment
- ✓ Quality assured

PARKING CONTROL

Maximise the security of your site or parking facility with the addition of security bollards, wheel stops, manual and automatic arm barriers.

These height restricting barriers are used for parking control and are manufactured from steel and fitted with a tube knocking bar and chain.

Description	Size (mm)
PCS630020 – 4m High x 4m Wide	H1200 x W2100 x D450
PCS630040 – 3.8m High x 6m Wide	H1800 x W2100 x D450

Height restrictors can be custom manufactured to order. Please contact our sales team with your specific requirements.

Our automatic barriers are a useful addition to your perimeter security solution. Commonly used in parking facilities and check points, automatic barriers are a useful tool for restricting vehicle site access.

Description	Size (mm)
PCS630100 – Automatic Raise 7m Arm Barrier	H450 x W7000

These parking barriers can be customised to requirements such as lengths of 3-7 metres.

Description	Size (mm)
PCS630200 – Standard Manual Arm Barrier – 3m	H1135 x W3000 x D450
PCS630210 – Standard Manual Arm Barrier – 4m	H1135 x W4000 x D450
PCS630220 – Standard Manual Arm Barrier – 5m	H1135 x W5000 x D450
PCS630230 – Standard Manual Arm Barrier – 6m	H1135 x W6000 x D450
PCS630240 – Standard Manual Arm Barrier – 7m	H1135 x W7000 x D450
PCS630250 – Standard Manual Arm Barrier – 8m	H1135 x W8000 x D450

Options for Heavy Duty version

Security Bollards

Colour Options: 

This heavy-duty parking post is painted black and yellow and features a durable base. The bollards are simple to install and ideal for use for vehicle restriction in warehouses and car parks.

Description	Size (mm)
PCS630500 – 1m Security Bollard	H1020 x W200 x D200

Wheel Stop Kit

Typically used to prevent unauthorised parking, heavy duty kerb stops can also be used to protect walls, racking, and machines such as car charge points. They are made from high density rubber and feature yellow chevrons to maximise durability and visibility.

Description	Size (mm)
STS211150 – 900mm Wheel Stop Kit with fixings	H11 x W1200 x D2400
STS211160 – 1650mm Wheel Stop Kit with fixings	H18 x W1200 x D2400
STS211160 – 1800mm Wheel Stop Kit with fixings	H18 x W1200 x D2400
STS211160 – 2000mm Wheel Stop Kit with fixings	H18 x W1200 x D2400

From first contact through to delivery of my order this company was exemplary in it’s actions. Communication was spot on with help and guidance in abundance. The whole transaction has made it a pleasure to deal with this company.

STS210780 - GRP Road Plate Fixing Bolts	H75 x W2300 x D500	-

Supa-Trac

These ramps are designed to be used alongside event mat and eliminate any trip hazards for easy vehicle access.

Description	Size (mm)	Weight (kg)
Supa-Trac Ground Covering	H275 x W966 x D27	2
STS211100 – Supa-Trac Ramp	H225 x W90 x D27	0.2

TerraGuard™

TerraGuard creates a firm surface for pathways, roads, temporary buildings as well as helipads and car parks. The heavy duty ground protection supports vehicles up to 2 tonnes and greater static weights.

Description	Size (mm)	Weight (kg)
TerraGuard™	H287.5 x W575 x D30	1.33

The cover is designed to comfortably bridge upto a 900mm hole or trench to create a permanent or semi-permanent solution quickly and easily.

Description	Size (mm)	Weight (kg)
STS211250 – Safe Cover 1.2m x 0.8m	H30 x W1200 x D800	13
STS211260 – Safe Cover 1.6m x 1.2m	H26 x W1600 x D1200	33

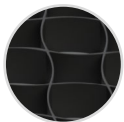

The covers can be quickly installed, and the black rubber edges grip the asphalt.

Description	Size (mm)	Weight (kg)
STS211300 – 1.125m x 1.125m LowPro Cover	H17 x W1125 x D1125	24
STS211320 – 1.2m x 0.8m LowPro Cover	H28 x W1200 x D800	17
STS211330 – 1.5m x 1m LowPro Cover	H37 x W1500 x D1000	38

SafeMat creates a 'non slip' surface that performs in the most challenging weather conditions.

Description	Size (mm)	Weight (kg)
GPS230300 – 2.4m Safe Mat	H15 x W2400 x D1200	44
GPS230310 – 3m Safe Mat	H15 x W3000 x D1200	44

This plastic gravel grid interlocks to create a porous paving system to reinforce the ground. The grids expand and contract with the weather and are made from 100% recycled plastic and are recyclable. Endura Grids are ideal for creating paths, car parks and can withstand the weight of 44t vehicles.

Description	Size (mm)	Weight (kg)
GPS230050 – Endura Grid Wall 4mm	H65 x W500 x D500	2

Suitable for work sites and events, these heavy duty Endura Mats provide road access for vehicles and pedestrians and can be installed quickly and easily.

Description	Size (mm)	Weight (kg)
GPS230070 – Endura Mat Ground Guard	H12 x W2440 x D1220	32
GPS230090 – Endura Mat Joint Clip	H12 x W2440 x D1220	–

Colour Options:   

This mat is made from recycled plastics and designed to be simple and easy to use. Simply place the mat on the ground.

Description	Size (mm)	Weight (kg)
GPS230200 – Clear Path Mat 4mm	H22 x W1200 x D600	20

Ground guards can be placed side by side to create large areas of ground protection including flooring and walkways.

Description	Size (mm)	Weight (kg)
GPS230900 – Ground Guard MultiTrack Mat	H13 x W2400x D1200	39

Safe Walk Matting

Safe Walk Matting is a great solution for creating walkways and clearly visible, defined crossing points for pedestrian/workforce safety and comfort.

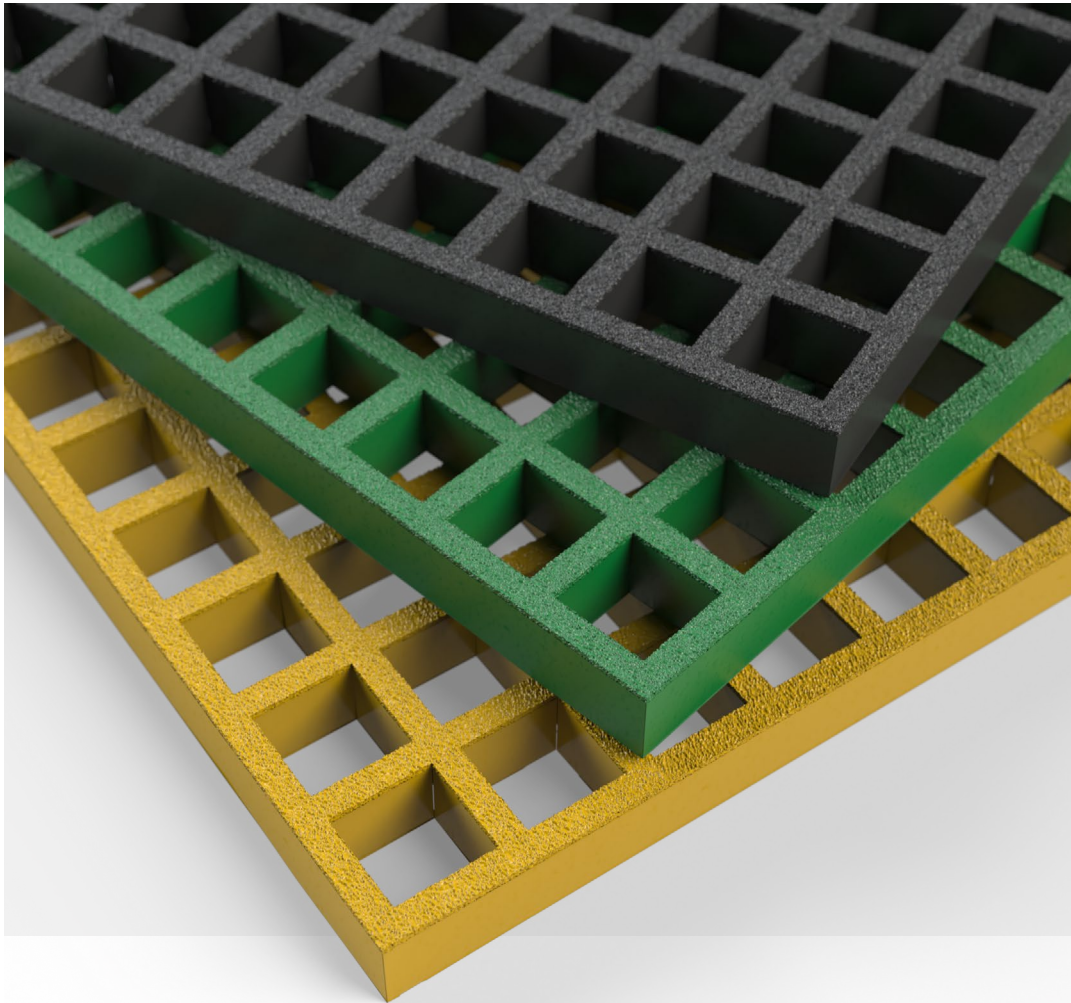

Description	Size (mm)	Weight (kg)
GPS230250 – Safe Walk Matting	H22 x W1200 x D800	20

Hardwood Bog Mat

Also known as 'crane mats' or 'timber mats', hardwood bog mats are FSC certified and create a steady surface on muddy or slippery ground for machinery, people, and materials.

Description	Size (mm)	Weight (kg)
GPS230850 – 140mm Hardwood Bog Mat	H140 x W5000 x D100	700
GPS230860 – 150mm Hardwood Bog Mat	H150 x W5000 x D100	750

Colour Options:   

GRP safety grating is a type of safety grating made from glass reinforced plastic (GRP), also known as fibreglass reinforced plastic (FRP).

Description	Size (mm)	Weight (kg)
STS210850 - GRP Safety Grating	H26 x W3043x D993	31

We also offer a number of other types of ground mats. Please contact our sales team with your specific requirements.

Fantastic & friendly customer service.
Delivery was made a day ahead.
We will definitely recommend your
company & come to you if we need
anything in the future.

safeSite INSTALLATIONS

Our installation process couldn't be easier!

We will deliver to your site anywhere in the UK within 24 hours of contact

We can install all our products from temporary fencing to water filled barriers on your behalf in a safe, efficient and professional manner

Browse our range of mesh and solid panel systems. Learn more about the sustainable and reusable options we offer, in addition to the appropriate ballast and stabilisation advised.

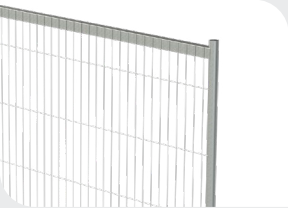

Free site inspections are offered as standard, and our experienced teams will deliver and install anywhere in the UK. Our hoarding panels are powder coated and can be custom painted according to your requirements.

DID YOU KNOW?

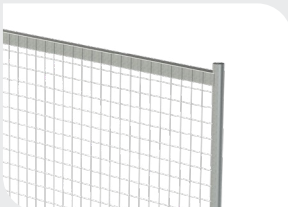

TEMPORARY FENCING & HOARDING

Temporary Fencing Options

Anti-climb fence panels

Our most popular type of fence panel. Cost effective and protects your site from potential intruders with both vehicle and pedestrian gates available.

Heavy duty panels with mesh

Stronger and more durable than our other types of panels. Used at events and on construction sites for demarcation and wind tested up to 57mph.

Temporary Hoarding Options

Temporary Steel Hoarding

Free standing so no digging or excavation required which makes this a short-term and cost-effective option. Ideal for events and construction sites.

On-ground steel hoarding

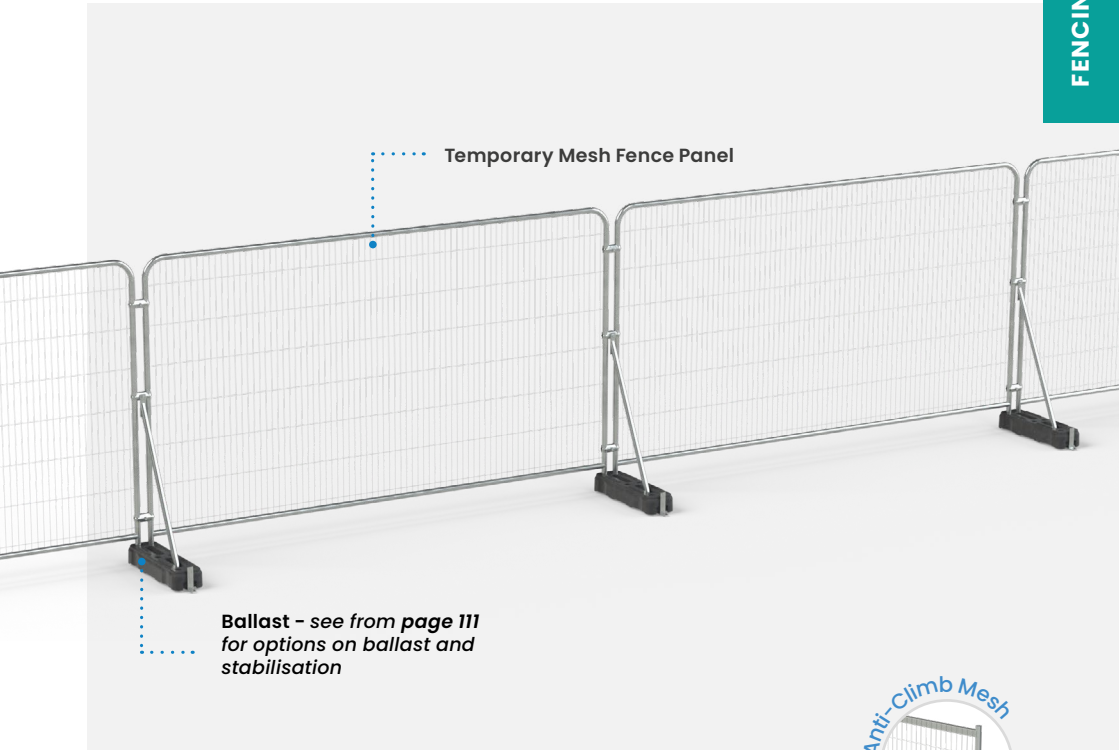

On ground hoarding is installed directly on the ground and is ideal for roads and pavements where excavation is not possible. Takes only minutes to install!

In-ground steel hoarding

Often regarded as a robust site perimeter best suited to long term construction projects. A portion of the hoarding is buried in the ground.

Also known as heras or mesh fencing, temporary fencing is self supporting panels. We offer anti-climb and heavy duty options of mesh fencing.

Colour Options:   

Description	Size (mm)	Weight (kg)
TFS100110 - 2m Std Temporary Mesh Fencing (Square)*	H2025 x W3450 x D40	10.5
TFS100130 - 2m Temporary Mesh Fencing (Square)	H2025 x W2140 x D40	12.2

Fence-Lok System

Providing a full and cost-effective solution for temporary fencing at your site, including surveys, engineering, installation, and aftercare, all covered in one price.

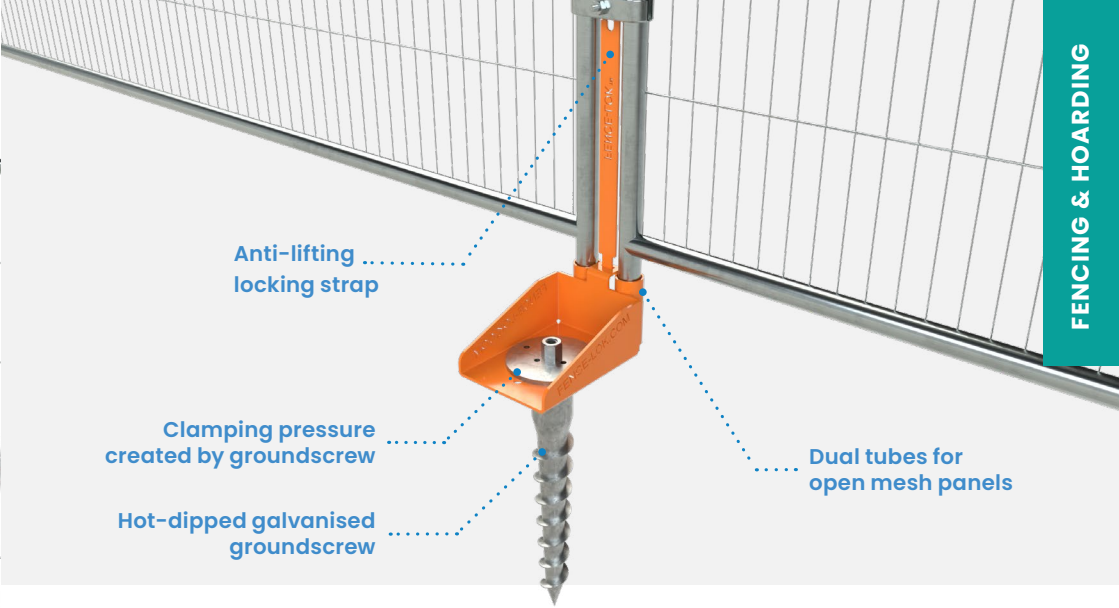

Set A—Open Mesh System

Set B — Open Mesh with Stabilising Brace System

Fixing Options	Depth (mm)	Qty Per Bracket
 Soil Fixing Ground Screw	500	1
 Concrete Fixing Screw	100	2
 Asphalt anchor fixings	100	2

Customer journey

- 1 Site Visit, Measure Perimeter and Load Test**
 - Free site survey to measure perimeter.
 - Free on-site soil, concrete, and asphalt load testing.
 - Temporary Works designs that comply with BS5975 for any site.
- 2 Temporary Work Design & Check**
 - Full Design Works & Check Certificate with calculation.
 - Design wind load calculation.
 - Preliminary Temporary works calculation based on soil load test.
 - Can be used with signage and branding
- 3 Supply Specified System**
 - Nationwide delivery and installation services.
 - Different fixing options. System can be installed on soil, grass, concrete, or asphalt surfaces.
- 4 Full Installation & Optional GPR Survey**
 - The System's Ground Screws can quickly be installed using a readily available petrol-driven or battery impact driver.
 - Free On-site training and support.
 - Cat scan as standard. GPR available if required.
- 5 Removal & Transfer To Next Site**
 - As simple to uninstall as it is to set up.
 - Constructed from robust, rust-resistant metal materials.
 - Relocate and reuse multiple times.

Hoarding

There are a range of materials and installation options for hoarding. We offer UPVC, timber and steel systems which can be installed into, or on top of the ground.

Colour Options: 

Free standing timber hoarding provides a secure perimeter around sites. It is an ideal option when it's not possible or appropriate to install 'in-ground hoarding'.

At SafeSite Facilities, we install the hoarding using above-ground support and ballast to achieve the same level of privacy, security and integrity as in-ground hoarding.

We recognise that every site is different, which is why you have the option to customise or brand your timber hoarding. Our customisation options include the thickness of timber and the colour or finish. We also custom-cut our timber to fit the exact size and shape of your perimeter.

Colour Options: 

A dug-in foundation for your timber hoarding ensures that the perimeter stays standing in most weather conditions. We only use FSC timber and can be installed anywhere in the UK.

Colour Options: 

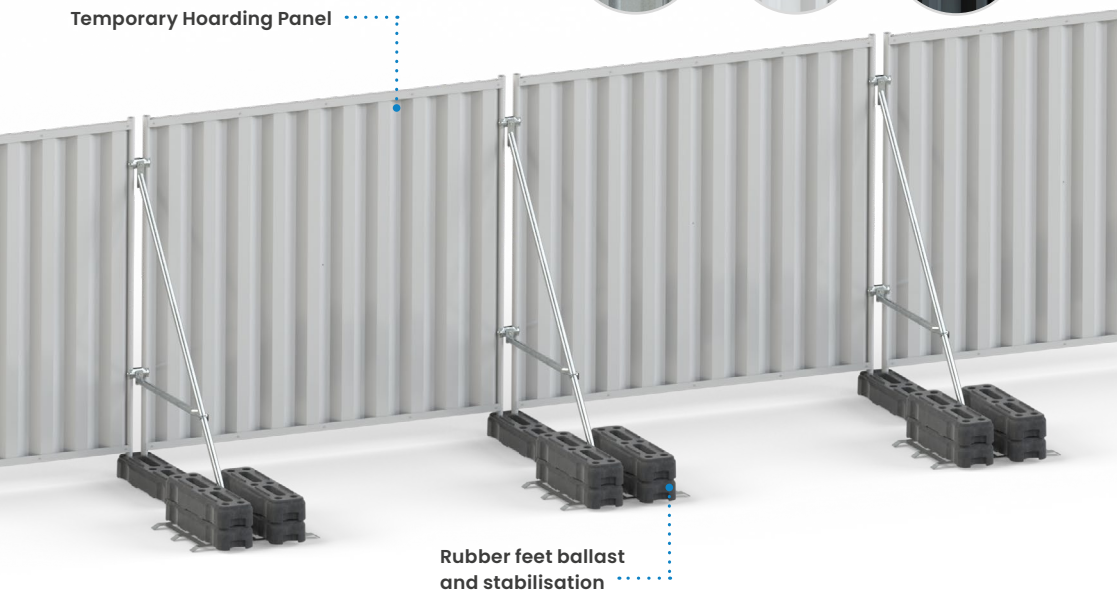

Made from 50% recyclable material - The UPVC hoarding can be used for any sort of terrain. Easy to install with no excavation needed.

Colour Options: 

Our steel hoarding has a quick and simple installation process, which means it is perfect for short to medium term projects. It is available in our standard grey, white and black powder coated finish, but we can also provide any colour at your request.

Temporary Hoarding Panel

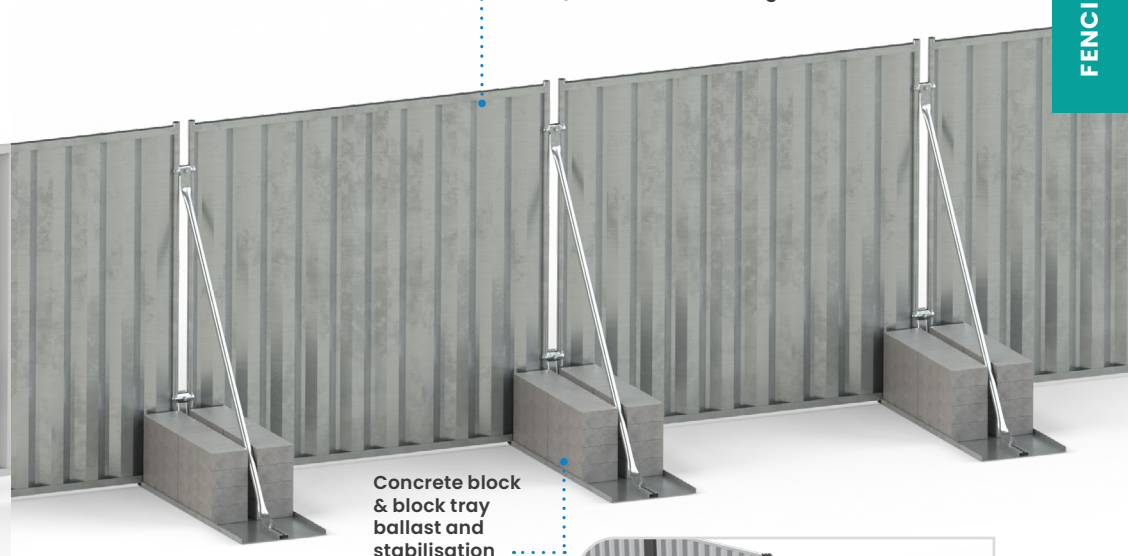

Rubber feet ballast and stabilisation

Description	Size (mm)	Weight (kg)
THS110050 - 2m Temporary Hoarding Panel	H1980 x W2140 x D40	30
THS110200 - 2.4m Temporary Hoarding Panel	H2380 x W2140 x D40	40
THS110350 - 2m Infill Panel	H1710 x W140 x D15	2.38
THS110400 - 2.4m Infill Panel	H2110 x W140 x D15	2.94

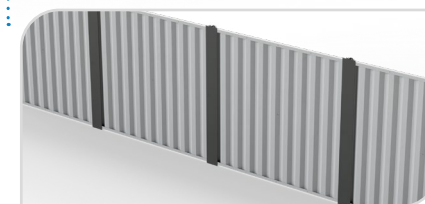

Colour Options: 

Steel hoarding panels sit flush with the floor and use a tray for holding ballast. The system is ideal for projects where high levels of privacy are required. The block and tray system means that there is a greater capability for holding ballast and increasing wind resistance.

In / On Ground Hoarding Panel

Concrete block & block tray ballast and stabilisation

We also provide an **In Ground Hoarding** Option. Contact our sales team for more info.

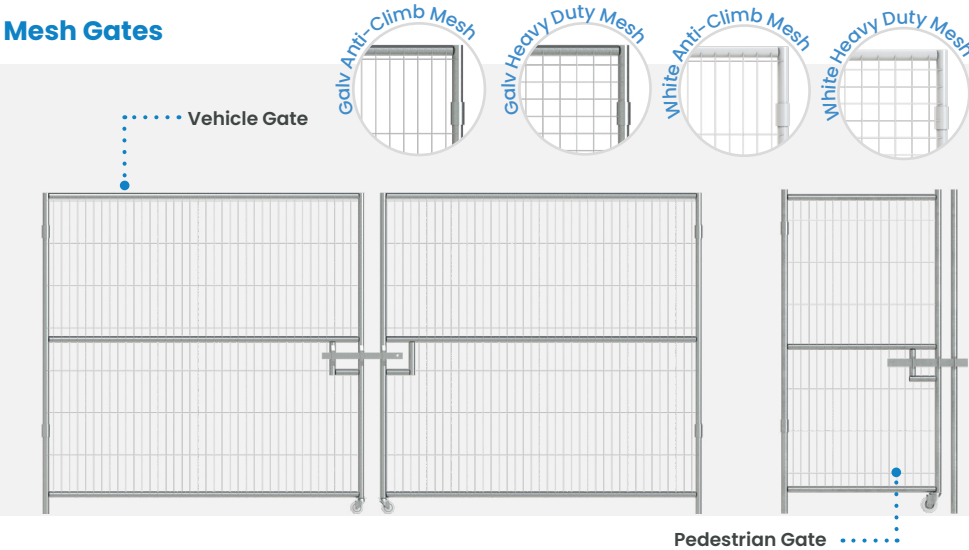

Description	Size (mm)	Weight (kg)
THS111050 - 2m In/On Ground Temporary Hoarding Panel	H2000 x W2100 x D43	30
THS111100 - 2.4m In/On Ground Temporary Hoarding Panel	H2400 x W2100 x D43	40

High Security Fencing

Permanent fencing which is installed into the ground is known as 'high security fencing'. Each type of fencing offers varying degrees of protection and can be used with a choice of add-ons, such as anti-climb spinners.

Colour Options: 

Chain link mesh fencing is manufactured from galvanised steel and comes in various sizes and dimensions.

The system is comprised of posts, pales and fittings and made from high quality steel.

Anti-Climb Spinners

Adding anti-climb rotator spikes to your fencing system will deter even the most ambitious intruders.

We sell, supply, and install high security fencing fence systems and gates.

For more information on your custom fencing needs please contact us for your bespoke high security fencing enquiries at info@safesitefacilities.co.uk

Edge Protection

Edge protection is essential for elevated areas within a site to prevent persons or machinery falling from height. These barriers are made from high quality steel and both the posts and mesh can be customised to any RAL colour.

Once correctly installed the Edge Protection Barrier can withstand up to a tonne of lateral force, more than enough to prevent personnel and light machinery toppling over a high ledge.

Description	Size (mm)	Weight (kg)
EGS250000 – Edge Protection Barrier 2.6m	H1150 x W2600 x D200	16.2
EGS250010 – Edge Protection Barrier 1.3m	H1150 x W1300 x D200	8.5

Timber fencing is an affordable, strong and aesthetically pleasing way to provide security and privacy for your property. We stock numerous styles of timber fencing to suit all needs and can offer timber, concrete and metal posts, depending on your requirements.

Typically used as a boundary for residential areas, vertical feather edge boards overlap to create a seamless, wood boundary.

Wooden posts and panels are a tried, tested, and effective way to create a uniform and professional boundary.

A popular option for use on farmland perimeters, post and rail fencing is straightforward to install and very effective in keeping large livestock contained.

These are created for bespoke purposes. Please contact our sales team for your enquiries at info@safesitefacilities.co.uk

“

I purchased several panels of security fencing for a new build property. It's a nice product at a good price and was delivered very quickly with no hassle.

Ballast Drop Blocks

Colour Options:

This sand filled ballast bag offers a quick, durable, fuss-free solution for improving the wind resistance of your pedestrian barriers. Ballast bags are ideal for locations where there are large numbers of pedestrians such as high streets and events.

Description	Size (mm)	Weight (kg)
PBS130455 Ballast Bag	H150 x W500 x D160	10

The sleek, compact design neatly drops onto the lower rail of a pedestrian barrier and features high visibility inserts to ensure visibility in poor weather and light.

Description	Size (mm)	Weight (kg)
PBS130470 Ballast Drop Blocks	H395 x W250 x D98	9

These environmentally friendly feet are manufactured from recycled PVC and are used as ground supports for our temporary fencing and hoarding panels.

Description	Size (mm)	Weight (kg)
TFS100600 Rubber Foot	H115 x W750 x D200	15
TFS100610 HD Hi-Vis Rubber Foot	H115 x W750 x D200	15

Stackable rubber ballast blocks are made from recycled materials and can be used as a fence foot or ballast. Each block weighs 20kg and can be stacked neatly to quickly increase the wind resistance of any fence system.

Description	Size (mm)	Weight (kg)
TFS100708 Rubber Ballast Block	H210 x W520 x D260	20

These are made from UV resilient MDPE and filled with concrete. The plastic shell ensures that the block is very visible and durable in all weather conditions.

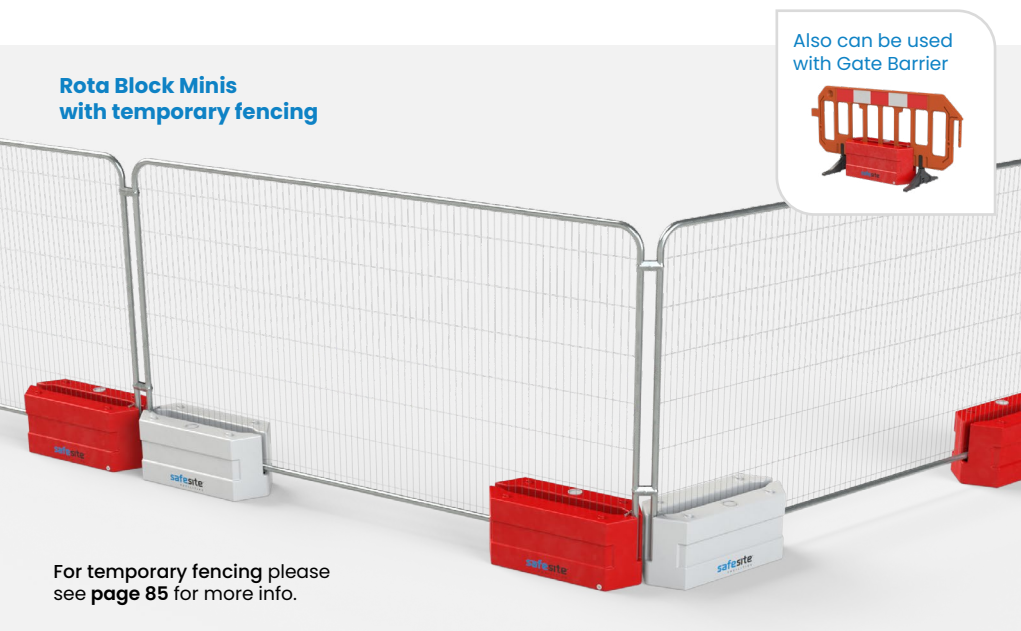

Description	Size (mm)	Weight (kg)
TFS100730 Hi-Vis Concrete Ballast Block	H295 x W609 x D300	44

Colour Options: ● ●

The road rock is a multi-functional base that can add stability to barriers and fencing. It is made from 100% recycled material and features a handle for easy lift up.

CCTV and alarms are integral to ensuring that a site is safe and secure. We offer mains, battery and solar powered CCTV & alarms that are monitored 24/7. Our solutions feature advanced AI technology which reduce false alarms and increase detection accuracy.

Safety can also be enhanced with the use of access control turnstiles as well as fire safety products to give sites full protection.

Battery Powered

Powered by batteries for up to a year

Wireless Alarms

We offer completely wireless battery powered alarms with visually verified high-definition images. The system uses advanced AI capability to accurately detect and deter intruders with automatic sirens and speakers.

Features

AI (Artificial Intelligence)

Advanced AI detection to filter out false alarms

24/7 Monitored Alarms

Full monitoring of alarms by our monitoring station

Sirens

Loud sirens to automatically deter intruders

Full 4G Connectivity

4G internet with a mobile app for live view and playback

Options for Power

Mains, generator or solar powered (3-4 day battery backup)

Rapid deployment mobile CCTV towers provide the ultimate visual deterrent against intruders. Deployable virtually anywhere, with or without power, your site will be protected by advanced AI cameras on a 5-6m mast.

Features

HD Cameras

4 x HD cameras (360 degree view) with 24hour recording

24/7 Monitored Alarms

Full monitoring of alarms by our monitoring station

Audio Announcements

Loud speaker to deter intruders

Full 4G Connectivity

4G internet with a mobile app for live view and playback

Temporary CCTV

Combining a traditional cabled CCTV system with advanced AI technology gives maximum coverage and protection for your site. You can watch the high definition cameras from a local monitor giving you full site visibility, with the peace of mind we will monitor your site when you're not there.

Features

HD Cameras

High definition cameras with 24hour recording

AI (Artificial Intelligence)

Advanced AI detection to filter out false alarms

Monitoring Station

Full monitoring of alarms by our monitoring station

Audio Announcements

Loud speaker to deter intruders

Full 4G Connectivity

4G internet with a mobile app for live view and playback

Timelapse

Record the whole duration of your project with a panoramic high definition camera. Showcase your full project into a few minutes with your chosen music and your own branding. Follow the evolution of your project with up to the minute images available through our secure online portal.

Features

Solar Power

Completely solar powered (or 12v power option)

Backup

Secure cloud image backup

Compact Design

Cable-free design means it can be mounted virtually anywhere

Versatility

Ideal for construction, demolition or events

Access Control

We offer temporary access control solutions to keep sites safe and secure.

Turnstiles

Monitor and control anyone who enters your site with an access control turnstile from Safesite Facilities. Multiple size options available from half height to full height turnstiles for maximum site security. The turnstiles can be integrated with the fire alarm system to automatically open in the event of a fire.

Features

Height Options

Half and full height turnstile options

Full audit log of every entry exit

Fire Alarm Integration

Automatic opening on fire alarm

Fire Protection

Protect people and property from the risks of fire with our range of temporary fire equipment. Built for the construction and event industry, all devices use long distance wireless technology to communicate. Low power consumption gives you industry leading battery life for less maintenance visits.

Smoke & Heat Alarms

The SafeSite fire / heat detectors can be wirelessly located around your site to detect fires. Integrated sounders create an 85dB alarm so separate sirens are not needed.

Fire Extinguishers & Trolleys

The manual fire call points can be integrated with our Fire Extinguisher trolley, which can be fitted with the appropriate extinguishers.

Manual Fire Call Point

The fire call points are wireless and can be located at key areas around your site. On the discovery of a fire, people can press the manual call point which will sound the alarm to all other devices on the network.

We also provide
Fire Risk Assessments
on your premises for your safety needs!
