## Multi-use Mobile Safety Station

Ensure your construction site remains compliant and safe with the Multi-use Mobile Safety Station, designed to be a highly visible and mobile display point for Health & Safety regulations, essential site information, and safety equipment.

Ideal for construction sites, warehouses, and industrial environments, this unit provides an organised and accessible solution to safety and regulatory needs.

The Multi-use Mobile Safety Station is a standout solution for managing site safety and essential equipment in high-traffic areas. This unit ensures that important health, safety, and legal notices are clearly visible to all workers. The top section features a noticeboard with a clear plastic, hinged viewing panel for easy display and access to key site information. The lower shelf is generously sized, ideal for storing larger safety items such as spill kits, fire extinguishers, or first aid supplies. An optional additional viewing panel for the base area can be added, providing flexibility in how you display or store critical items.

Other colours available on request
