FACILITIES

2.3m Trade Pedestrian Barrier

This 2.3-metre pedestrian barrier offers a cost-effective solution for crowd control and pedestrian management.

Featuring a 7-bar design, it provides essential functionality for various events and public spaces.

The barrier’s interlocking system allows for secure and continuous connections, adapting to different layouts and terrains. Its lightweight construction ensures easy transportation and installation, making it suitable for both temporary and semi-permanent setups.

Ideal for applications such as crowd management at events, delineating pedestrian pathways, and enhancing safety in public spaces.

Features Fixed Feet

2.3m Pedestrian Barriers in a line

Key Features

- > 7-bar design for effective pedestrian control
- > Interlocking system for seamless connectivity
- > Lightweight and easy to handle
- > Compact design for efficient storage
- > Galvanised finish for corrosion resistance
- > Available in various colours upon request
