

## HEAVY DUTY STEEL SECURITY DOORS

### OVERVIEW

SafeSite Facilities are proud to offer the newest updated version of our heavy duty steel security door. The multipoint locking system, Dual dog bolts and heavy duty latch hold the door securely in its frame leaving potential intruders with no option than to move on.

Our heavy duty steel security doors comprise of the following features:

SafeSite Facilities Anti-vandal specification 1.2mm galvanised / powder coated steel construction with 2mm frame

Anti-jemmy hinge bolts and frame lip

Allows full width access and removable door skin

Existing entrance door can be retained in place

Minimal damage with four flexible fixing methods

Available widths: 800mm, 840mm & 870mm

Multi-point locking system

\*Please note that if you require steel doors made to a custom size please contact our sales team.
