Skipper Cone Topper

The Skipper Cone Topper improves standard traffic cones, converting them into a flexible and cost-effective temporary barrier system. Valuable for roadside projects, health and safety measures, and maintenance and engineering tasks.

The Skipper Cone Topper is an additional add-on to most standard traffic cones and enhances roadside and site safety, featuring a 9m high-visibility tape to create an immediate safety barrier.

With 4-way connectivity, this traffic cone topper streamlines area cordoning. It effortlessly retracts upon release from the lock, and its compact design requires minimal storage space when not in use.

Key Features

- > High Visibility and extendable belt design
- > Creates a quick and easy temporary barrier
- > Fits Most Standard Traffic Cones
- > 4-way connectivity
- > Lockable tape end as standard

Topper used with standard Traffic Cone
