Clear-Path Walkway Mat – 1200 x 600mm

High-visibility Clear Path mats are ideal for marking temporary pedestrian crossings, greatly reducing the risk of accidents in potentially hazardous areas.

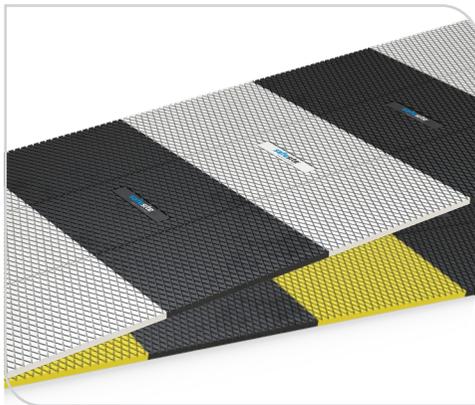

Clear Path Walkway mats provide a temporary pedestrian crossing and are designed to safely mould to both flat and uneven surfaces. They are manufactured in the UK using recycled plastic. Highly durable, they can be used many times, making them a convenient, environmentally green and cost-effective solution for interim crossings and walkways.

Our flexible and durable anti-slip Clear Path mats are easy and quick to install, without any ground fixings required (supplementary fixing bolts are available if desired).

No ground fixings are required so Clear Path mats can be rapidly installed if required. They are highly durable and provide an anti-slip surface.

Key Features

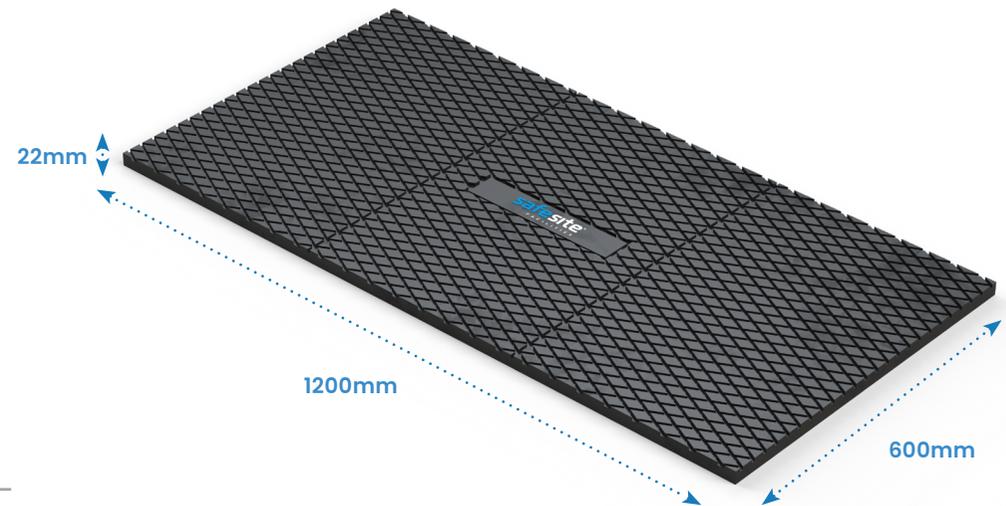

- Temporary pedestrian crossing
- Rapid install with no need for ground fixings
- Ideal for construction sites, warehouses, events and car parks
- Very high durability
- Available in Black, white & Yellow
- Made out of tough recycled plastic and is recyclable

Available in Black, White & Yellow

Ideal for construction sites
