20 inch Rubbish Chute

Ideal for the safe disposal of rubble from high levels, this chute is quickly and easily assembled in sections with convenient chain connections.

The 20 inch Rubbish Chute is a long, lightweight and robust, weighing only 8.5kg per section. Once connected and chained, the sections create a very safe and secure system. An addition to the base unit we have the 20 inch Top Hopper, with its enlarged opening, facilitates easier loading of rubble or waste, preventing overspilling or missing the hopper. We also offer the interconnecting Side Hopper, ideal for loading builders waste from multiple levels into the same skip.

Key Features

- > Made from MDPE & HDPE
- > Optional Top, Side Hoppers & Fixing Frames
- > Abrasion Resistant
- > Safe and straightforward method for disposing of waste
- > Lightweight & stackable – space-saving & easy to transport
- > Equipped with galvanized steel safety brackets and chains for connecting to other chutes
- > Other Rubbish Chute sizes available
