Skipper Traffic Cones

The safety cone with a twist. The Skipper road cone stands out as a distinctive two-piece design, surpassing its competitors in every aspect.

The Skipper road cone features a design with an integrated helix, effectively deflecting wind and contributing to enhanced stability.

Compared to other retroreflective sleeves on traffic cones, the skipper cone has a innovative glass bead sleeve, more reflective than other alternatives. In case of damage by a vehicle, one advantage is their replaceable parts, allowing for easy replacement.

Key Features

- ▶ Heavy duty & Replaceable parts
- ▶ Rapid deployment for space marking
- ▶ Comes with innovative glass bead sleeve
- ▶ Additional attachable 9m skipper tape unit available
- ▶ Base manufactured from 100% recycled material
- ▶ Compliant with BSEN13422 and Chapter 8 standards
