Steel Road Plate

Any size and thickness required can be supplied but as a standard we have large stock of 4ft x 4ft and 8ft x 4ft.

The plates can be supplied plain or with an anti-skid coating, in either 1/2" & 3/4" thickness and are manufactured using industry leading, Rocbinda High Friction, Skid Resistant Surfacing system.

The plates can also be branded, with over 20 colours, a range of protective paint finishes that offer additional protection and spray painted logo customisations.

Key Features

- ▶ Customisation options available
- ▶ HAPAS & BBA approved materials
- ▶ Identification marks and company name welding is available
- ▶ Choice of over 20 different colour skid resistant finishes
- ▶ Bespoke fabrication
