Over a year battery life, no solar panels required.

MOBILE PERIMETER ALARM POD

The SafeSite Alarm Pod (also known as PIDs, Armadillos or Darleks) is a re-deployable alarm unit which features 4 high definition cameras to visually verify intrusions. Compared to competitor solutions, the SafeSite Alarm Pod offers a greater detection range, higher image quality, does not require solar panels and all for a lower total cost.

Key Features

Automatic Beacon
Instantly deter intruders with a bright flashing beacon and siren.

Fully Monitored
All alarms will be remotely monitored by a 24 hour NSI Gold monitoring station.

Motion Activated Detectors
PIR sensors with a combined camera which takes high definition snapshots

4G & Mobile App
You can use the mobile app to view images and arm/disarm site.

Detection Range Options
Standard: 12-15m
Enhanced: 20-25m

AI (Artificial Intelligence)
Advanced AI detection to filter out false alarms
