4m Concrete Barrier

When insurance companies request a site to be blocked by a large immovable barrier – our huge, 4m concrete blocks are the answer.

These concrete barriers need to be specially delivered and installed onsite with a rigid lorry and grab crane. The absence of lift eyes and slots means that they are immovable without specialist equipment. These are suitable for large open sites where a short- long term perimeter solution is required such as car parks, farm and highway land. Once on site, these 4m immovable barriers provide instant security and piece of mind.

These are available for hire or sale and can be reused repeatedly.

4m Concrete Barrier Specification

Measurements in mm

Length	Width	Height	Weight (kg)	Product ID
4000	630	800	4750kg	CBS120550
