6m Concrete Barrier

Secure your site with maximum coverage and uncompromising strength using our 6m Concrete Barrier.

Designed for high-security environments, these heavy-duty concrete blocks provide an effective physical deterrent against unauthorised vehicle access and site intrusion.

Ideal for construction sites, infrastructure projects, and temporary or permanent perimeter protection, each barrier delivers exceptional stability without the need for ground fixings.

Designed for high-security environments, these heavy-duty concrete blocks provide an effective physical deterrent against unauthorised vehicle access and site intrusion.
