

CENTIPEDE II EXPANDABLE BARRIER INSTALLATION GUIDE

Quick to deploy and easy to use, our Centipede II Expandable Barrier can be used just as effectively inside as it can outside. Its versatility makes it ideal for use across the board no matter the scene or situation from crowd control to cordons.

People to Install:

Equipment / Accessories Needed:

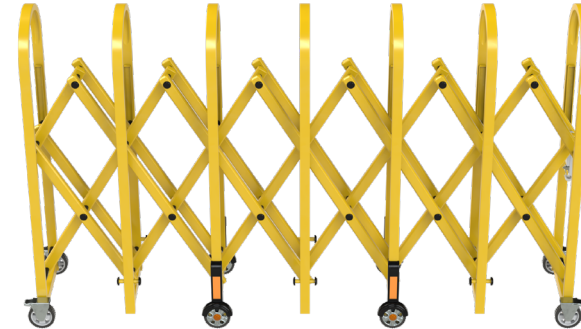

No accessories are required

1

Before assembling the barrier, make sure the area is flat, clear and free of debris. The barrier's rubber wheels ensure it can be used on even the most delicate of surfaces.

2

Next, simply open the barrier and pull into position until the product reaches the desired length. With a maximum of 1200m at full extension, the barrier's flexibility makes it the perfect choice for larger events.

3

Do the same for the feet, ensuring they are locked into place, so the barrier is firmly secure and held in position at both the top and the bottom.

4

The Centipede II Barrier can be used on its own, or doubled up with additional of barriers. The grey locking mechanism can be used to secure the barrier to a wall, or other barrier.

Useful Tip: : Fully foldable and retractable for ease of storage and transportation.

Wear the appropriate PPE for this task.
