

Clear-Path Walkway Mat

SPECIFICATION SHEET

Clear-Path Walkway Mat

The Clear-Path Walkway Mat has been designed for use within construction sites, car parks, outdoor events and can be utilised in various other applications where creating a temporary pedestrian crossing maybe required to reduce the risks of potentially hazardous areas causing an accident.

The Clear-Path Mats have an anti-slip surface, are flexible whilst still durable and can be rapidly deployed, without the need for any ground fixings (supplementary fixing bolts are available if desired) The unique design allows the mat to safely mould to both flat and uneven surfaces to create zebra crossings and walkways.

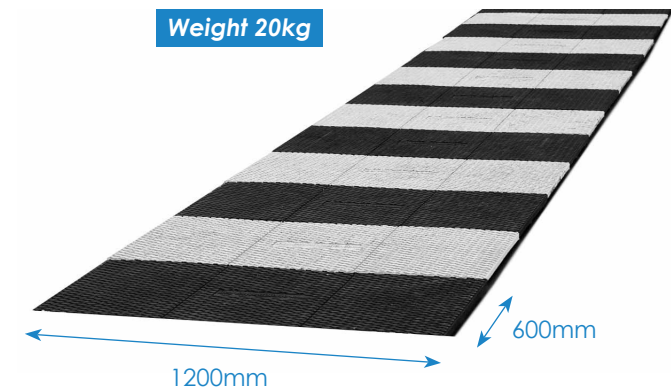

Clear-Path Walkway Mat Specification

Length	Width	Height	Weight
1200mm	600mm	22mm	20kg
