Ekki Hardwood Timber Bog Mats

The Ekki Hardwood Timber Bog Mats are engineered from the robust African Ekki tree, offering superior strength compared to standard hardwood mats.

These high-performance mats are designed for extremely heavy-duty operations in challenging environments, making them an ideal solution for temporary roadways, piling, and bridging applications, both in wet and dry conditions.

Manufactured using D70 graded construction timber, the Ekki Hardwood Timber Bog Mats provide unparalleled support, easily handling weights more than 50 tonnes (subject to ground conditions). These mats are specifically suited for use with steel-tracked vehicles, offering maximum durability in the most demanding construction environments.

Key Features

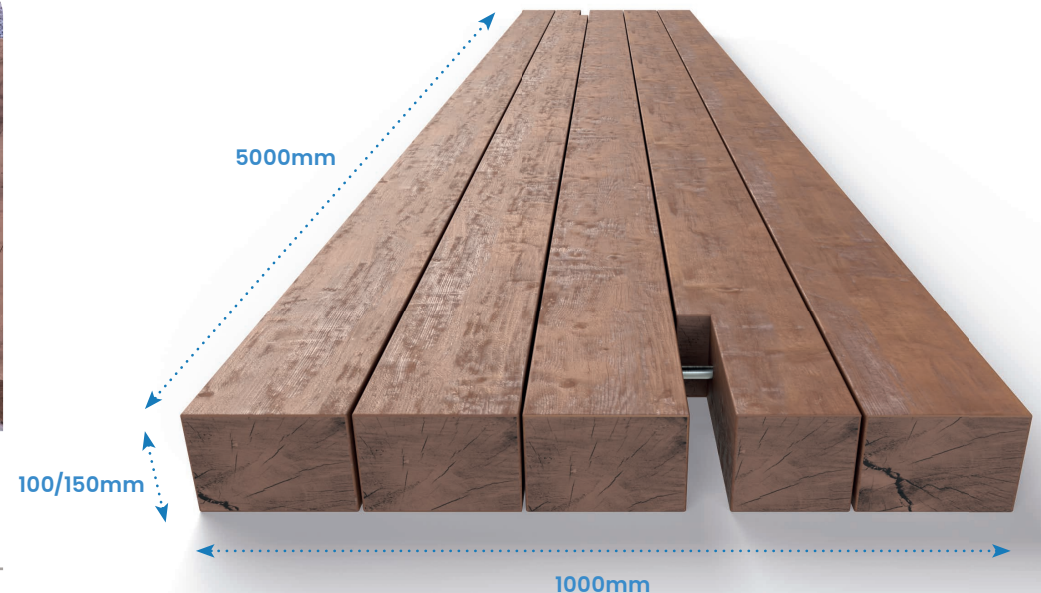

- Premium Ekki Hardwood – tough and durable
- Two thicknesses available – 100mm/150mm
- Load Capacity Supports 50–200 tonnes, tested up to 250 tonnes
- Ideal for oil, gas, utility, and bridge projects
- Sourced from sustainably managed, FSC-certified forests
- 100% recyclable
