

ILLUMINATED SAFETY WALKWAY SPECIFICATION SHEET

PRODUCT INFO

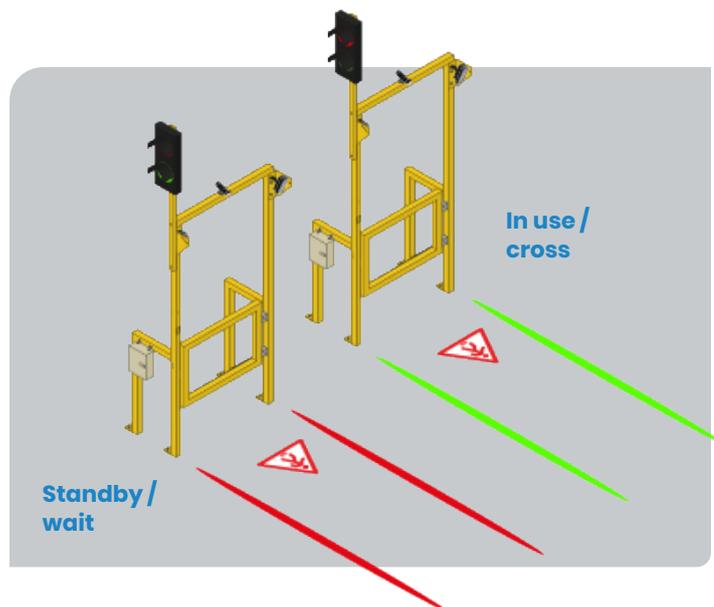

Be safe, be seen. The Illuminated Safety Walkway addresses the unacceptable risks within the People/Plant Interface on road crossings.

Communication between the two has been a challenge on-site until now. Through the simple use of visual messaging, your workers and site visitors can move with confidence and peace of mind with the Illuminated Safety Walkway.

The light beams can project up to 25m using two frameworks. Additional beams can be added to create a wider crossing.

KEY FEATURES

- ▶ Easily identifies crossing points
- ▶ LED Red Green Traffic Light
- ▶ Simple and intuitive Push button
- ▶ Projector to cast an "Caution, Look Left and Right" message
- ▶ Allows pedestrians to traverse safely with ease
- ▶ Ensures site-wide peace of mind around crossings
- ▶ Day & night solution
- ▶ Traffic control for both pedestrians and drivers
- ▶ Optional Mag-Lock creates a further layer of control, keeping pedestrians strictly away from the road until safe to cross
