

## SSF SHARPS REMOVAL

### Overview

Safe Site Facilities provide a controlled removal of syringes, needles and other sharp objects to avoid any serious harm, as it is important that this type of waste is be dealt with to evade any harmful diseases or serious infections. Illegal drug users will leave sharps such as needles, syringes, and blades in vacant properties, public areas, bins and toilets. The highest danger with sharps such as needles and syringes is the disease they can carry such as Hepatitis B and HIV so it is imperative that they are removed and disposed of ethically and efficiently.
