FACILITIES

2.3m Eco Pedestrian Barrier

Designed with both sustainability and safety in mind, the 2.3m Eco Pedestrian Barrier is a smart solution for managing foot traffic while reducing environmental impact.

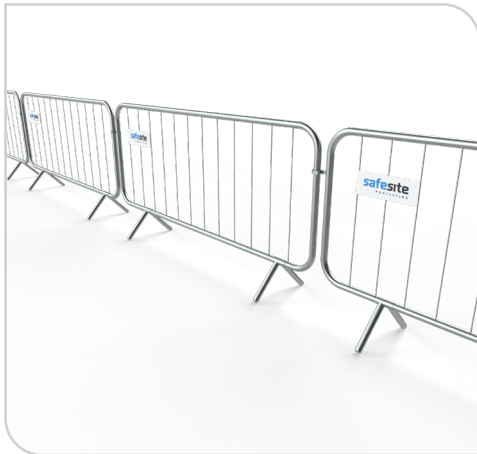

This barrier offers unmatched strength while being mindful of materials and energy use during production, making it one of the most sustainable barriers on the market.

Recyclable Materials: Made from fully galvanised steel, these barriers are built to last and 100% recyclable at end of life.

Customisable and Reusable: Powder coating in your preferred RAL colour extends the product's lifespan and reduces the need for frequent replacements, cutting down on environmental impact.

Simple hook for Interlocking
