2.3m Pedestrian Barrier

Offering quality, affordability and durability, the fixed-leg 2.3 metre pedestrian barrier offered by SafeSite Facilities is ideal for controlling pedestrian segregation and ensuring safety during events.

These pedestrian barriers are 2.3 metres in length and feature an innovative interlocking design, allowing you to create a strong and continuous barrier that cannot be broken or breached easily. Our 2.3 metre pedestrian barriers are the strongest on the market.

To offer you more flexibility, the interlocking design offers a 90-degree rotate function that allows you to lock these barriers even at corners.

Key Features

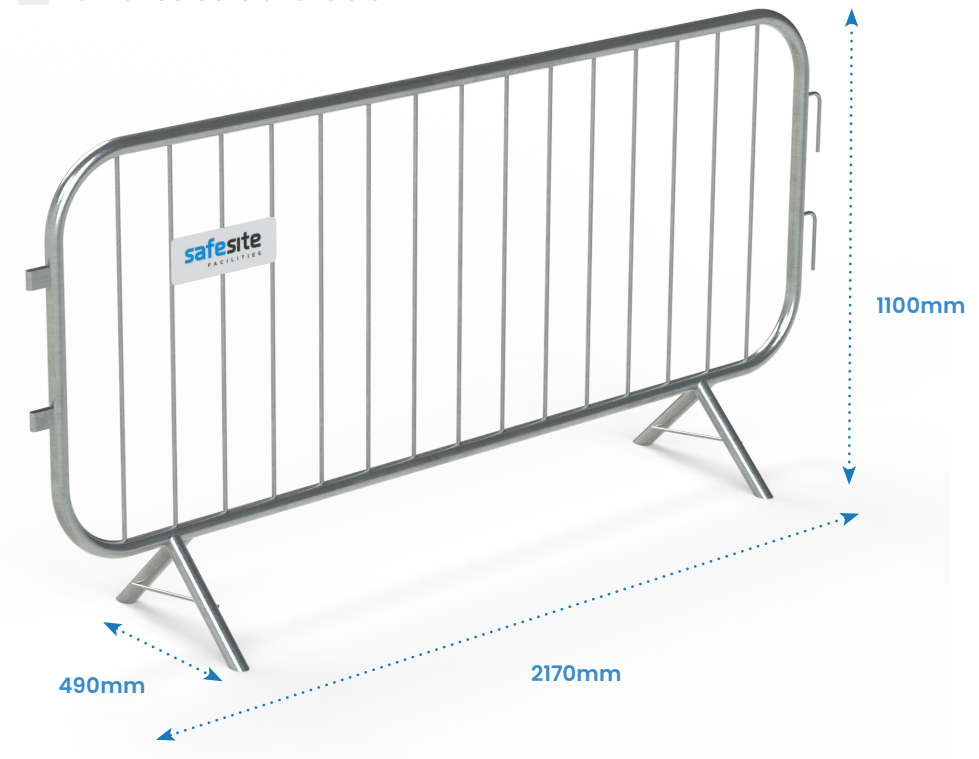

- › Ideal for pedestrian segregation
- › Interlocking design
- › Easy to transport and install
- › Streamline design for ease of stacking
- › Smartweld Technology
- › Other colours available

Features Fixed Feet
