Pedestrian Barrier Drop Ballast Block

These ballast blocks are easy to handle and quick to install. The sleek, compact design neatly drops onto the lower rail of a pedestrian barrier and features high visibility inserts to ensure visibility in poor weather and light.

These drop ballast blocks are safe, robust, and easy to use. They do not require fixing clips or accessories and so are the perfect solution for adding additional wind loading to pedestrian barriers already in place.

Pedestrian Barrier Drop Ballast Block Specifications

Measurements in mm

Depth	Width	Height	Weight (kg)	Colour	Product ID
98	250	395	9	Black	PBS130470
