Fencebrite Reflective Security Fencing Strips

Improve the visibility of temporary fencing, site boundaries and pedestrian or vehicle routes with Fencebrite Reflective Security Fencing Strips.

Designed to attach directly to temporary fencing and similar structures, the highly visible red and white stripes provide a simple way to make site perimeters easier to identify during the day, at night and in poor visibility.

Available in 2m and 3.5m lengths, Fencebrite is quick to install using the supplied fitting straps and can be removed and repositioned when site layouts change.

FenceBrite Strips attached to temporary fencing

Fencebrite Reflective Security Fencing Strips Specification
