Danger Overhead Cables 750mm 2 Piece Traffic Cones – Blue

Our Danger Blue Overhead Cables Traffic Cones are designed to clearly identify overhead hazards and height restrictions, helping to improve safety for drivers of high-sided vehicles in construction, industrial and logistics environments.

Available in 750mm these specialist traffic conesfeature a durable two-piece construction with a heavy-duty black ballast base for excellent stability in challenging weather conditions. The highly reflective blue sleeve provides outstanding visibility in both daylight and low-light conditions, making them ideal for sites where clear hazard communication is essential.

Manufactured to meet the relevant UK standards for traffic management, Blue Traffic Cones are commonly used to highlight low bridges, overhead pipework, gantries, loading bays and other height-restricted areas.

High visibility overhead cable sleeves

Danger Overhead Cables 750mm 2 Piece Traffic Cone Specification

Description	Size (mm)	Weight (kg)
STS212140 – 750mm Danger Overhead Cables Traffic Cone (2 Piece)	H750 x W270 x D270	4.75
