FACILITIES

## 2.3m Pedestrian Barrier Loose Leg

SafeSite Facilities provides an excellent solution for low-level perimeter security and crowd control at events with our robust and high-quality 2.3m loose leg pedestrian barriers

These barriers are made with a galvanised finish, adding durability and preventing them from rust and damage. To add stability and weight to these loose leg 2.3m pedestrian barriers, you can use weighted or anti-trip feet to prevent these barriers from tripping over in crowded events.

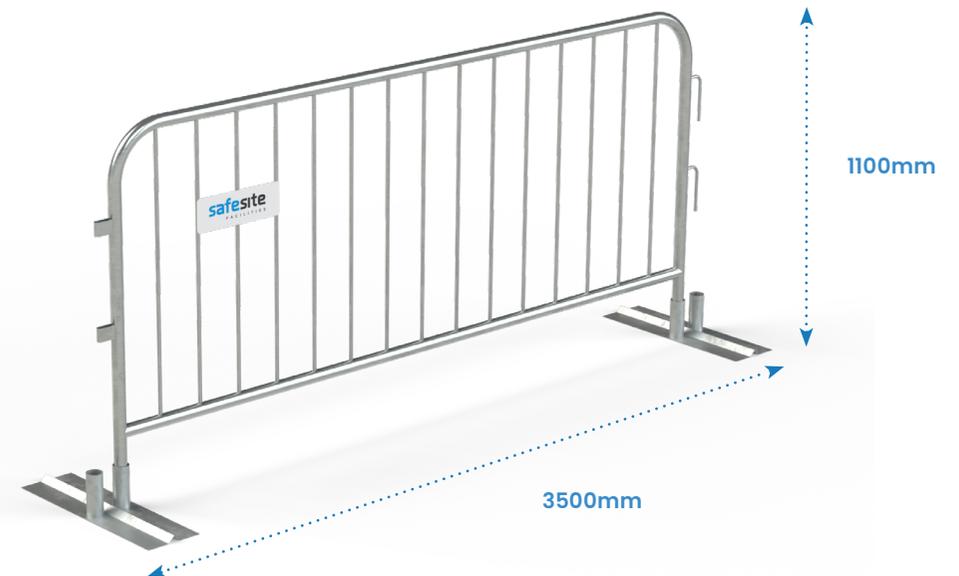

White & Red Colour Options Available

Rubber Feet Option

## Key Features

- > Ideal for directing foot traffic
- > Weighted and anti-trip feet
- > Fully galvanised and robust Smartweld Technology
- > Easy to transport and install
- > Other colours available
