HD Cable/Hose Protection Ramp

The heavy-duty one-piece moulding enables easy vehicle access across areas with cable or piping runs.

Featuring two large channels for conduit, and side ramps for smooth vehicle passage without contact. With a 30-tonne compression strength, it's built for durability. The Dog Bone connection ensures secure linking in longer runs. Made from 100% recycled, fully recyclable materials, it's weather and impact resistant, and non-conductive ideal for tough, eco-friendly applications.
